

Decarbonising APM Terminals

2030 Targets

70% Reduction of Scope 1 & Scope 2 emissions

Key Levers

- Switch to renewable electricity (RE)
- Electrify our operations
- Optimise energy consumption
- Adopting green fuels
- Shore power to vessels

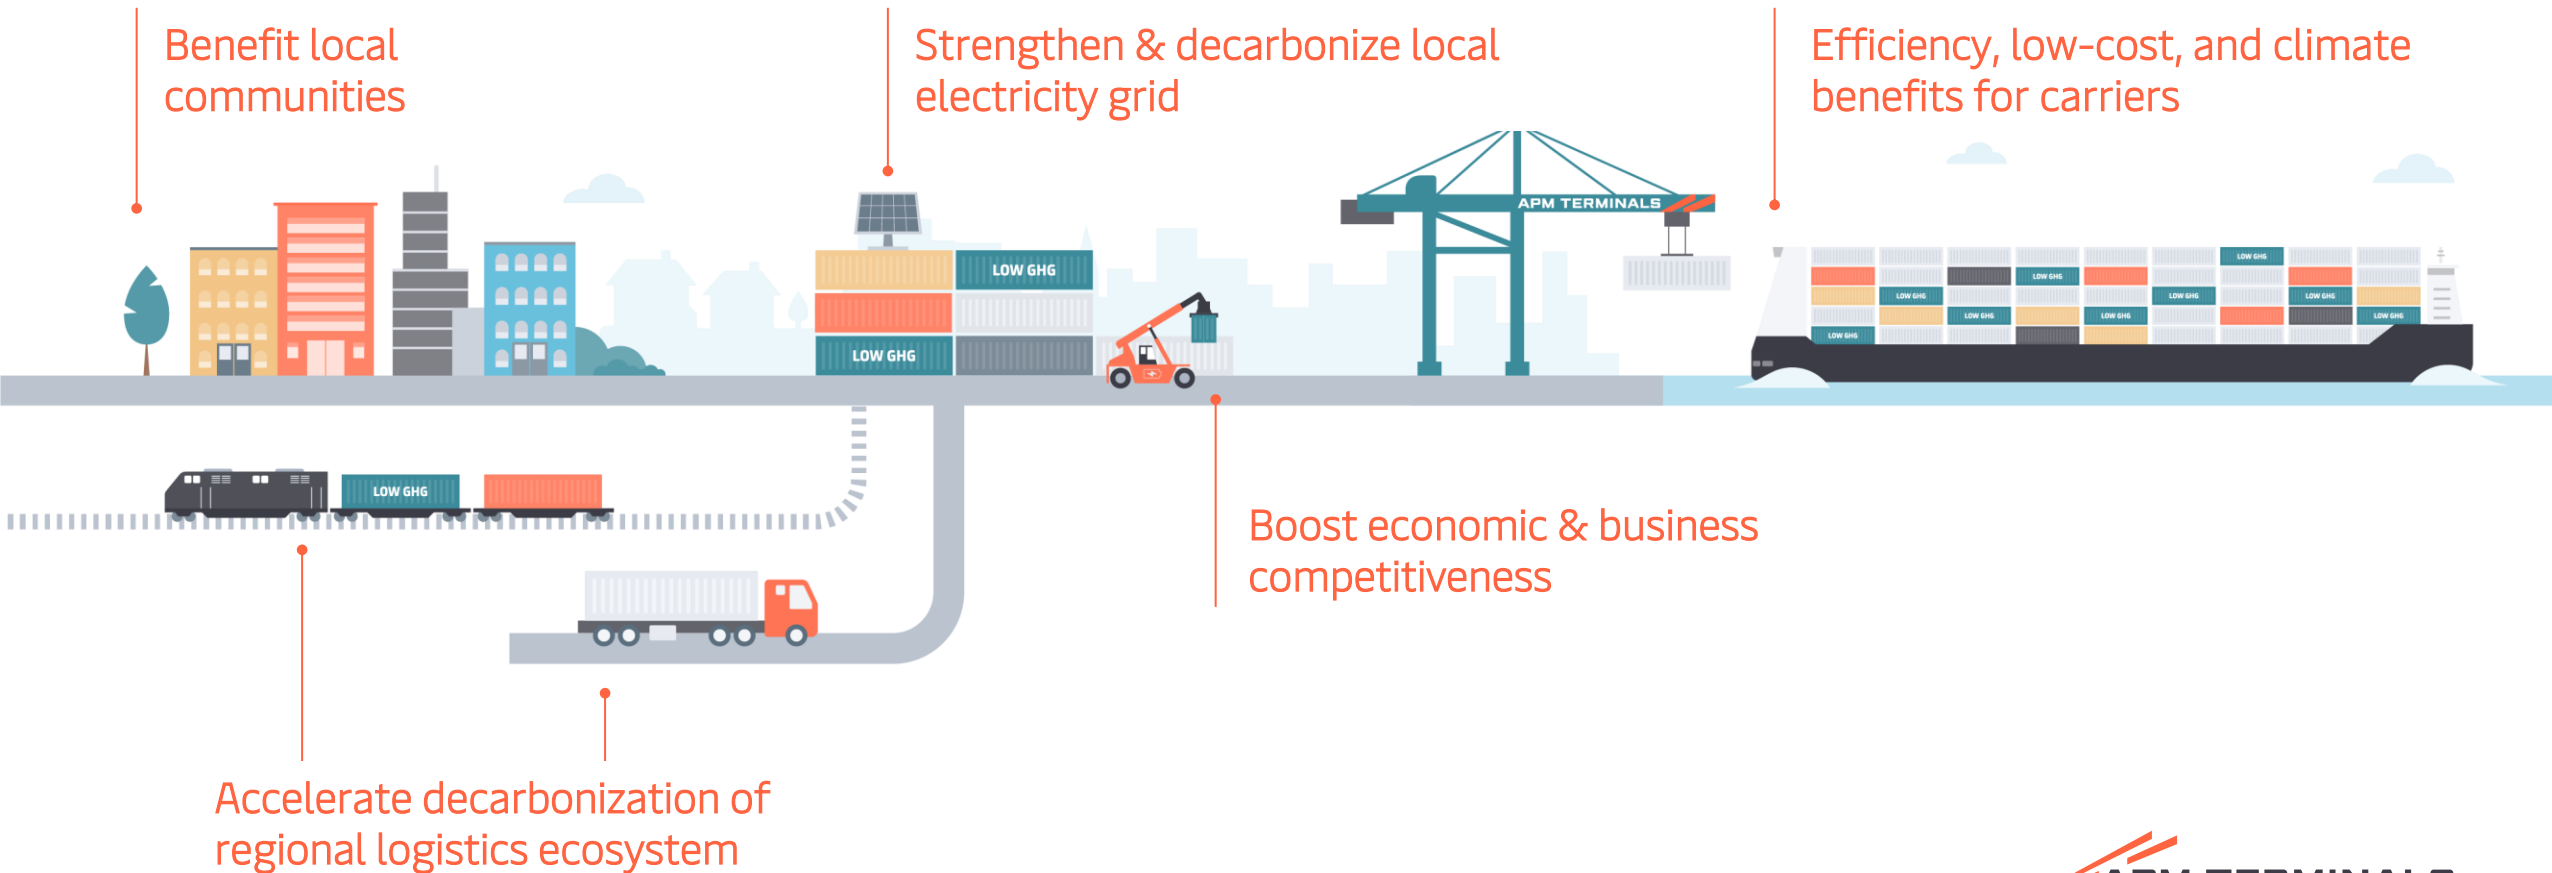

Actions

- Implement RE through PPAs, onsite installation and green electricity tariffs
- Pilot & scale new battery-electric container handling equipment
- Mobilize the industry via Zero Port Emission Alliance

Our ambitious climate strategy delivers value for all stakeholders

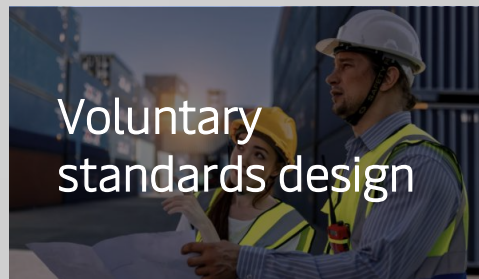

Leading decarbonisation
in the port & terminals
industry

Attention: Soren Jensen
Subject: Transforming Aqaba Container Terminal into a carbon-neutral Terminal

Dear Sir,

With reference to the above mentioned subject, and in light of the Global efforts to protect the climate, supporting the United Nations sustainable development goals SDGs, and reducing carbon emissions through prudent management of these emissions and access to environmentally friendly measures.

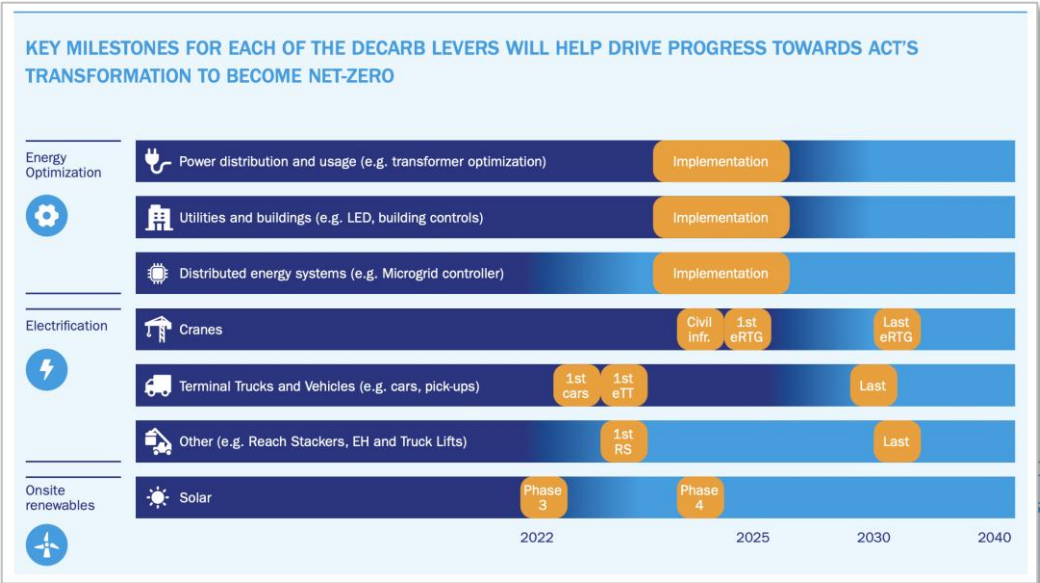

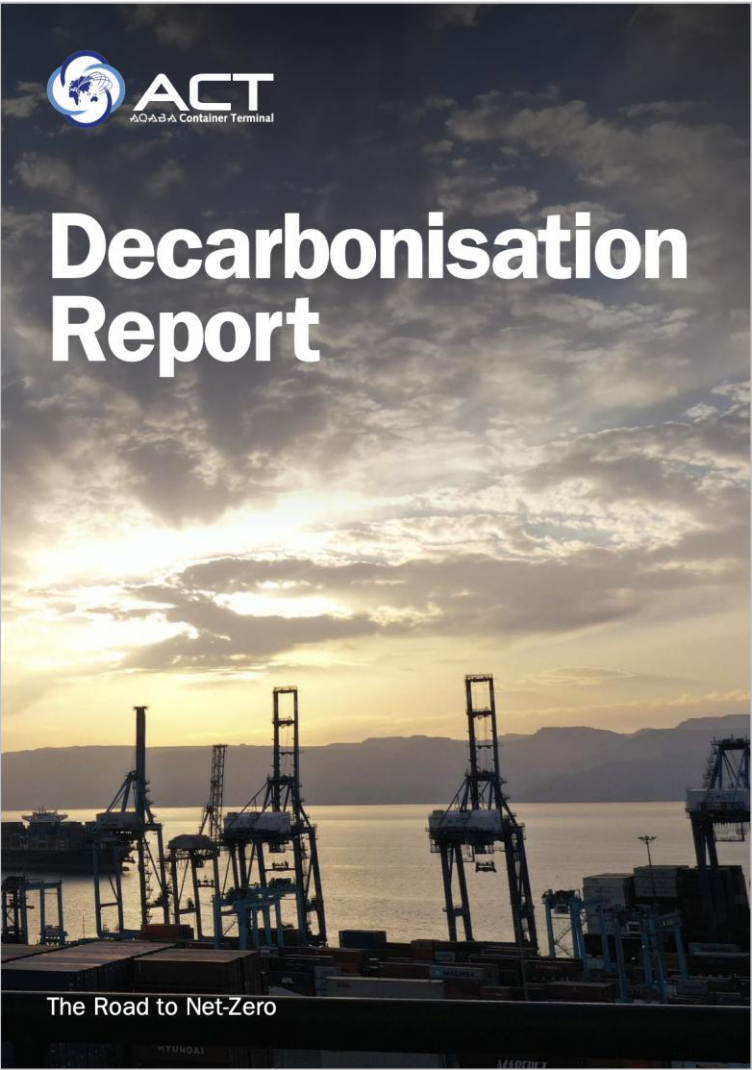

ACT is kindly requested to provide ADC with the developed and feasible plan to transform Aqaba Container Terminal into a carbon-neutral terminal, and staging to reach the final level of the Seaports Carbon Emissions Management Program to obtain the highest level of global accreditation for this program, in order to make Aqaba Container Terminal an environmentally friendly terminal, enhancing it's regional and international competitiveness and identity.

Sincerely Yours,
Hussein Safadi
Chief Executive Officer
