DSP Product Installations in 2022

In 2023, DSP will obtain the ISO 27001-2013 certification to grant Information security, cybersecurity, and privacy protection to its customers

Our core business

TOS CONSULTING

DSP team supports the Terminal Operations in all the phases of the Terminal Operating System implementation, maintenance and support.

BUSINESS INTELLIGENCE

Product:  DATAVIEW

DATAVIEW is the Business Intelligence for your terminal showing you any data everywhere in one view.

DIGITAL TWIN

Product:  GEMINI

GEMINI is our Digital Twin solution. GEMINI is a platform, bespoke on the characteristics of every single terminal organization, able to mirror decisions, strategies and show workers practice during real operations.

TOS Consulting

TOS Implementation

360° assistance in Terminal Operating System implementation, upgrade and support.

- Project Management
- Analysis
- Configuration
- Data Migration
- Customization
- Integration
- EDI
- Reporting
- Testing
- Training
- Go Live Support
- Post Go Live Assistance
- Help Desk

Analysis and Design

Assist maritime and logistics businesses to assess the current status of internal procedures and strategies, to design new solutions and to enhance the overall operation of the company:

- Business Process Mapping
- Implementation Blueprints and SOP
- Revenue and ROI Analysis
- Tender preparation
- Simulation

Optimization

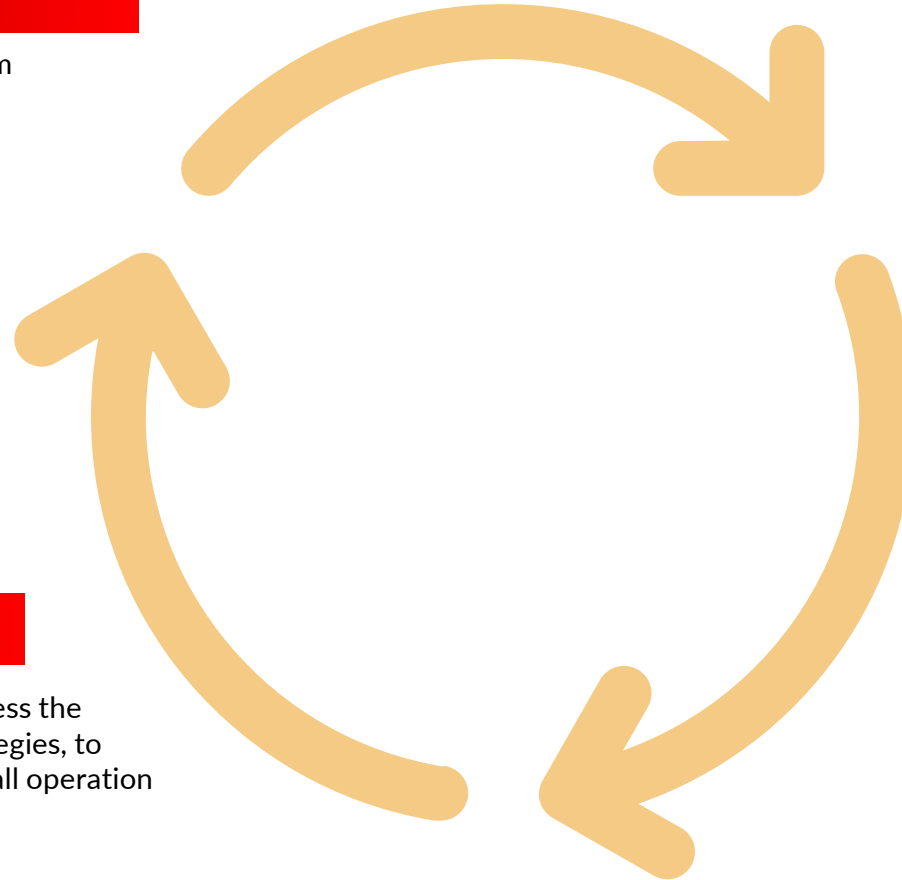

To understand the product features and how to set algorithms and processes to maximize your investment and performance:

- Emulation and “What if” Scenario
- Planning and Execution Strategies
- TOS Tuning
- Change Management
- KPI measurement

Automation & Digitalization

DSP is your technology accelerator on digitalization and automation transition:

- Process automation architecture and integration
- Equipment automation integration design
- Custom Agile Software Development

Part 02

Context Insight and Challenges

Port congestion, turbulence, high demand of logistics supply chain.

New perspectives

Logistic: an unexpected journey

Manage the impossible

MARCH, 2021

Ever Given container ship blocks SUEZ Canal traffic.

APRIL, 2022

Containers pile up at CHINESE ports as lockdown blocks trucks.

2020 onwards

Delivery Services See Historic Rise in Demand During Pandemic and still lasts

OCTOBER, 2021

Record-breaking 100 Ships anchored, waiting at LOS ANGELES and LONG BEACH Ports.

Change Direction

Concretely Innovate

Know your problem, learn the technology, tailor your solution

Understand

Acknowledge your issue
Define your objective
Set Expectations

Access Technology and
Innovate with the right tools

Data and Visibility

Internet of Things
Open communication Layer

From Data to Information

Digital Twin and Artificial Intelligence

Digital Model to **mirror, simulate, emulate the reality**

Artificial Intelligence to apply to
the model and to reality to
enhance decisions criteria

Automation

Process automation

Remote Drive

Autonomous drive

Part 03

Digital Intelligence Solutions platform for container terminals

Empower operations and drive overall efficiency

Gemini Solutions

GEMINI combines operational, tactical and strategic optimization through operational databases (TOS), predictive analysis, simulation, scenario management, emulation, virtual commissioning.

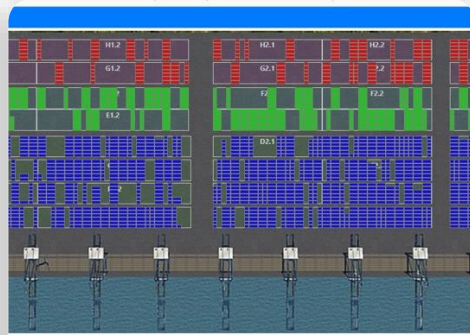

Predictive Analysis

Operations and Technical Services Optimization

Future and «What if» scenario to identify ways to improve performance and increase profit on a daily basis

Simulation

Concept Design

Evaluation of how a structured change affects the business scenario.

Design of Greenfields

Transition to Automation

Emulation

Operations Empowerment

Validate, tune and improve planning and operations strategy.

Testing of operations platform (ECS, TOS, GOS, OCR)

Automated Testing

3D View

Live Augmented Reality

Visualization of live operations with IOT data.

Virtual Terminal Tour

Alternative to TVCC for remote control

Virtual Commissioning

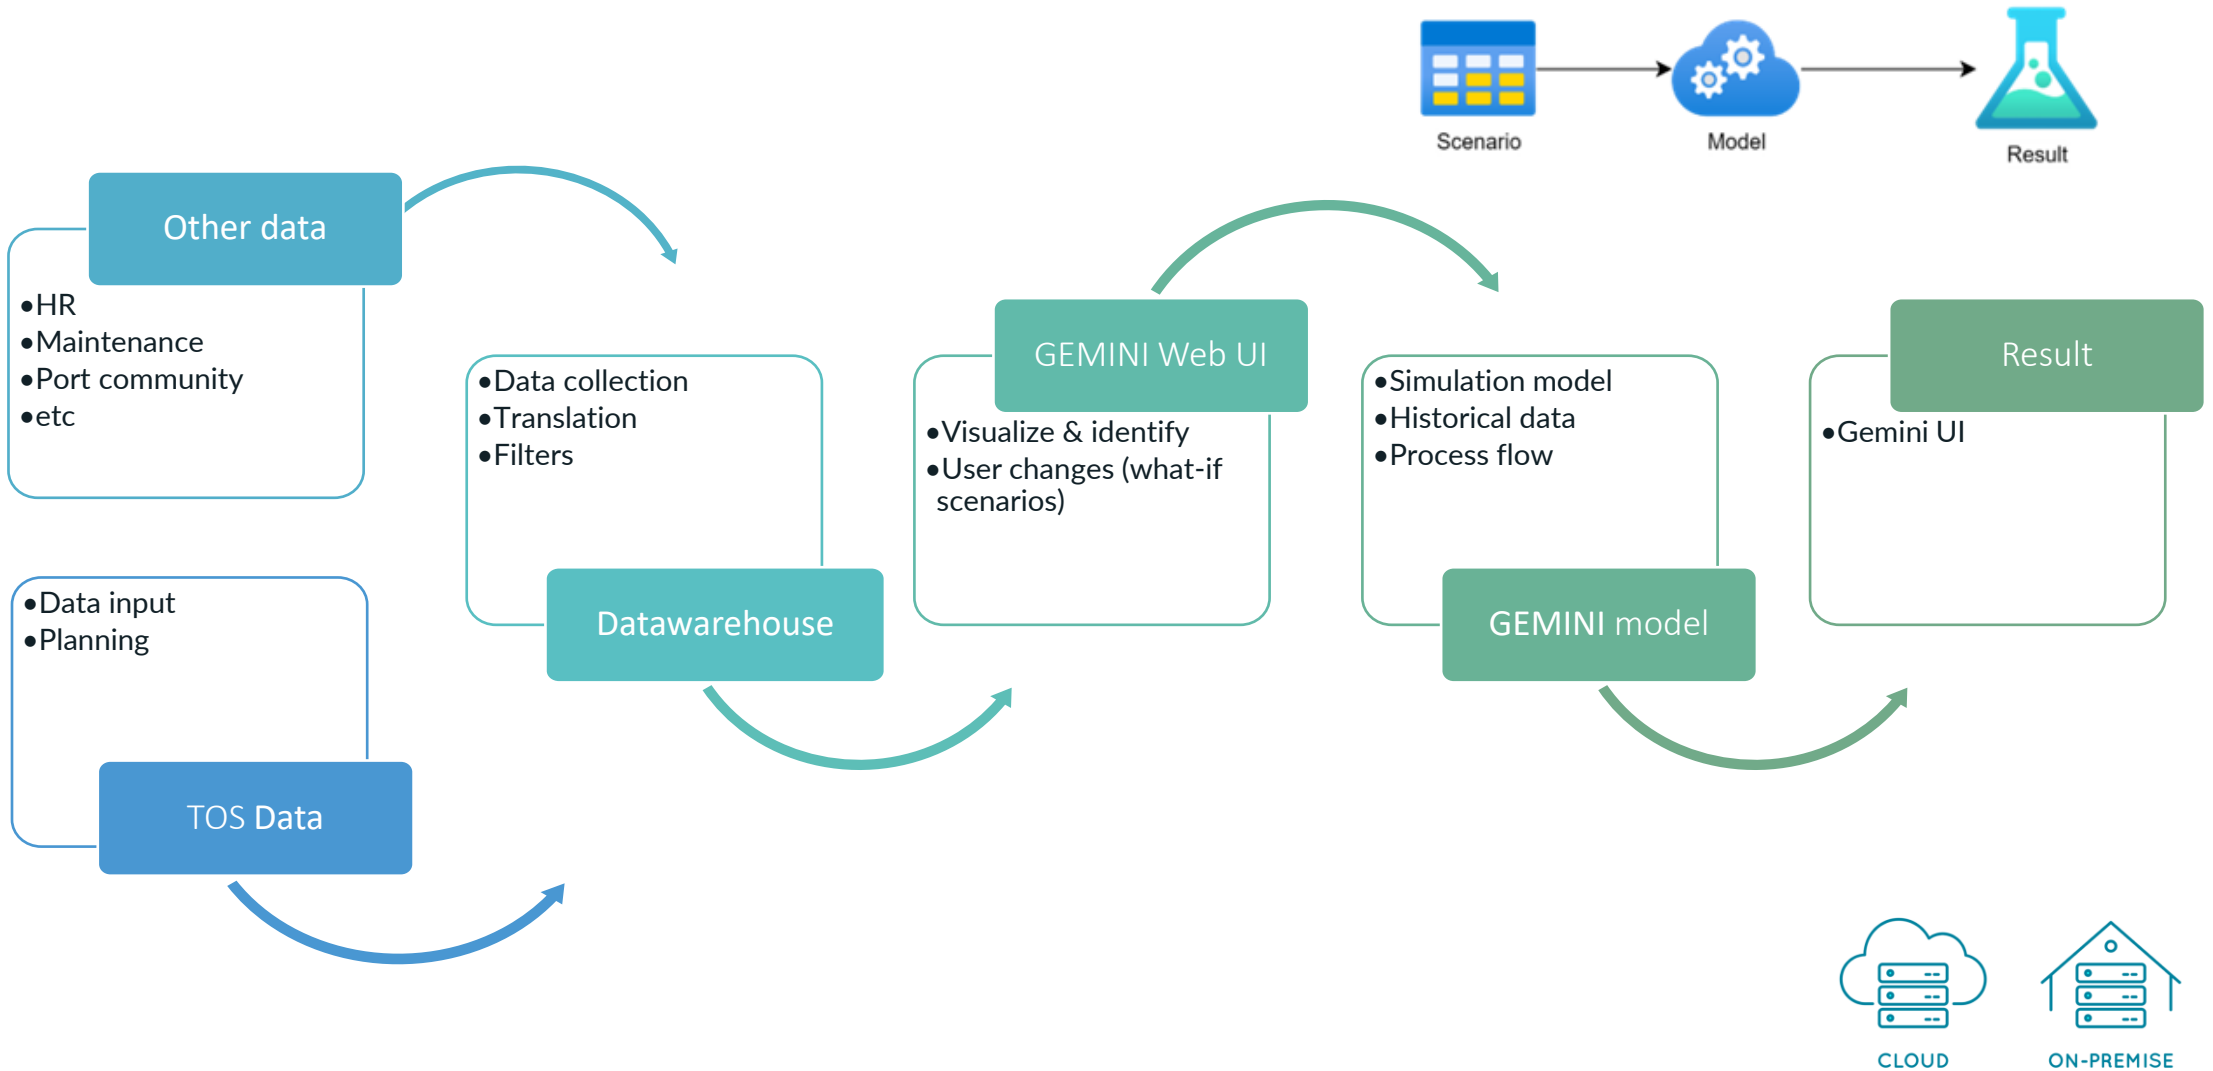

Engineering Services Optimization

Crane Control Systems testing and commissioning

Powered by:
controlLab

Gemini Data flow

Part 04

GEMINI Use case

CSP Valencia Terminal

CSP Valencia terminal

Strategically located in the Mediterranean, the terminal enjoys a hub position in the **main maritime routes connecting Spain and Europe** with other continents.

Its 2.3-km berthing line and 145-hectare yard, as well as a port railway terminal with direct connections to Madrid, Zaragoza and Bilbao and an **automatic gate system** for local cargo flows explain why CSPV is the benchmarking terminal in the Mediterranean.

Valencia terminal has a capacity of more than **4.5 M TEU**, operated by **21 STS** and **65 RTGs**.

“We’re working hard to learn side by side with DSP, how to get the most advantage of using their Digital Twin solution. We see a lot of potential on it and DSP is supporting us to adapt it to our local needs”.

Ignacio Huet, IT Director

Challenges and Objectives

Why going for digital intelligence from the terminal operator point of view?

Berthing process

Increase berth occupancy and facilitate transshipment connection.

Optimize STS assignment (crane split) and working plan.

Declare reliable ETDs

Resource Assignment

Optimization of yard resource (RTG, TT, RS) assignment per shift in relation to volume forecast, yard moves impact time

Gate

Optimize appointment window and predict gate transaction volume.

Reduce turnaround time and make truckers happy.

Equipment Maintenance

Predictive maintenance to plan intervention and increase mean time between failure and overall crane availability.

Solution: Predictive Analysis

WHAT IF SCENARIO

Berthing process

- Support Berth Planner decisions with suggestion of Efficient Crane Splits and Work Plan
- Impact of sudden change of a vessel crane working plan to the whole terminal operations
- Monitor and alarm on ETDs

Resource Assignment

- Support Shift Manager to deploy available resources
- Predict and optimise resources required for the next shifts
- Monitor Peaks and unproductive time

Gate

- Predict gate transactions volume
- Truck flow, peaks and operational impact estimation
- Suggestion on dynamic Truck appointments strategy

Equipment Maintenance

- Schedule Planned Maintenance based on future equipment utilisation, actual worked moves (MMBF)
- Forecast of non-operational windows Anticipate put at disposal for planned maintenance

Dashboard - STS assignments and yard resources

Past, present, and future KPIs
