# Prospect for Regional shipping in Indian ocean

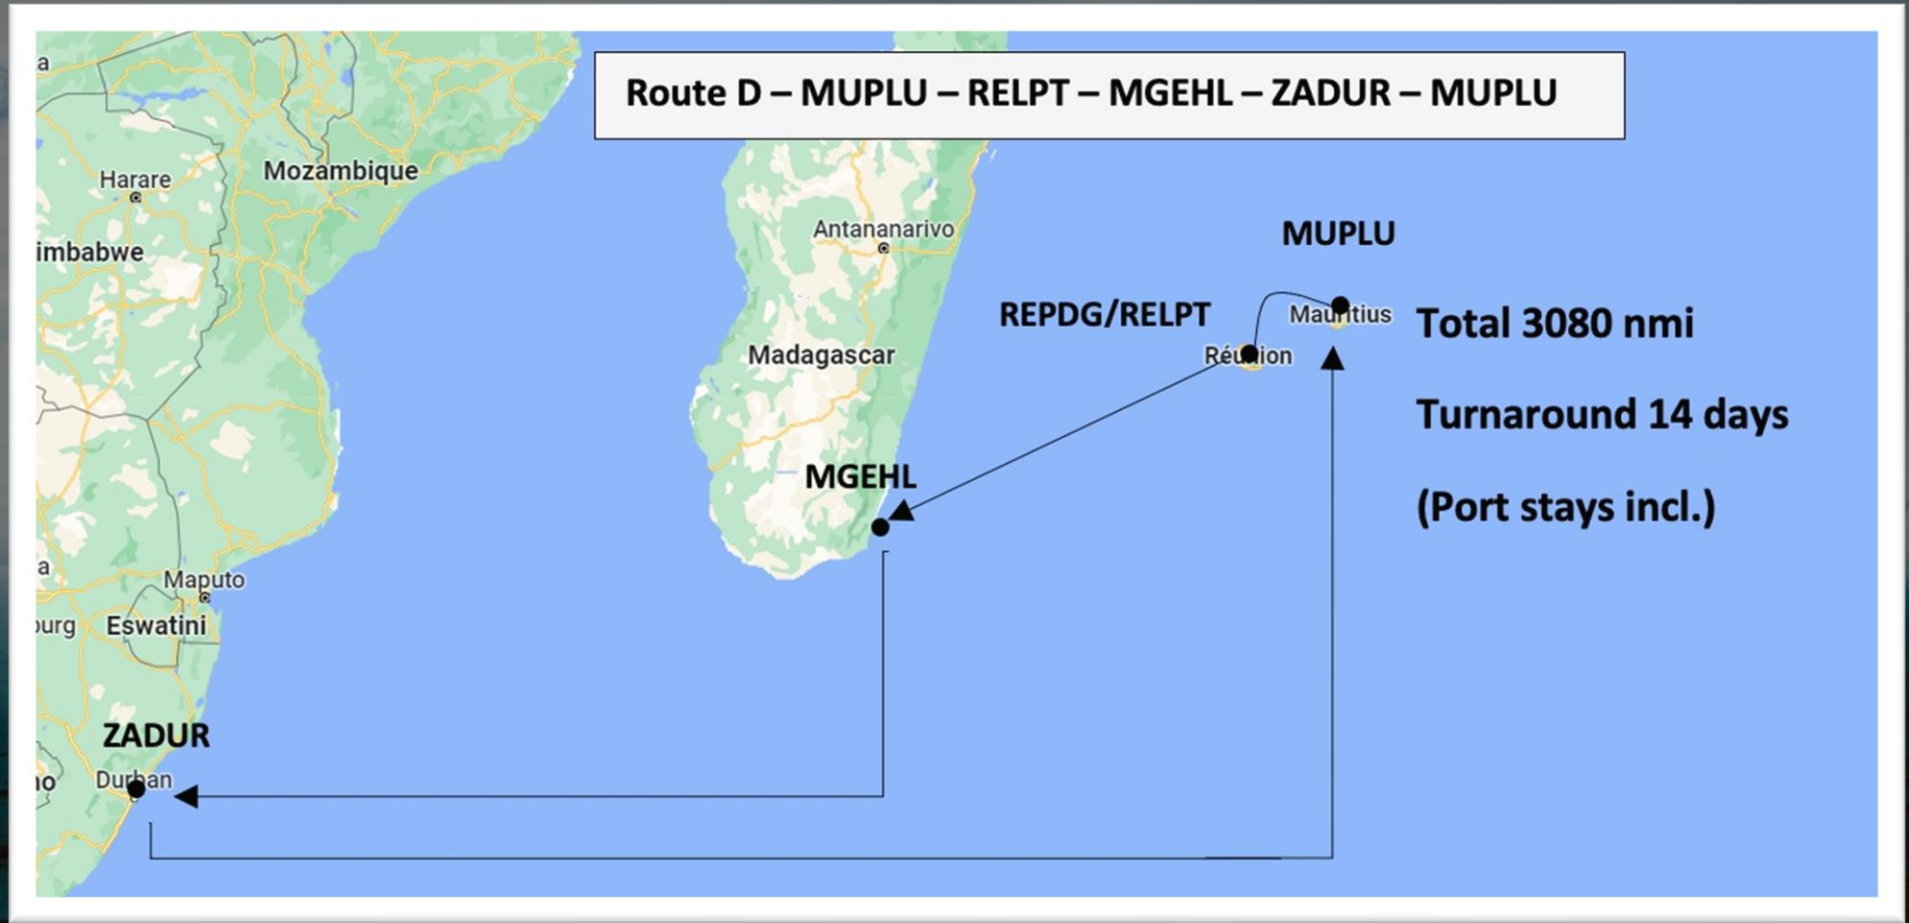

“

***Shipping is intrinsically-linked to economic growth and trade.  
And Trade is about empowerment.***

***Our all weather RoPax will stimulate trade, education and  
employment in the region and reduce cargo travel time thus  
empowering the Indian ocean.***

***We hope you have a wonderful New Year's celebration with your  
loved ones and look forward to collaborating with you closely in the  
coming year.***

”

## *Capabilities*

- 200 MT Blending capacity at one time with fully automated blending process complying with licensed API and SAE
- Capable to blend 10,400 MT per month

## *Blending Facilities*

- 125,000MT per anum blending capacity (single shift)

## *Expertise*

- Trained & Senior Staff
- Accurate Lubricants Specification
- Cost effective pack selection
- Regional product knowledge
- Familiar with products specification over the Globe Reduced process tim

## *Polymerization*

- Silverson Solublization
- Automated Thermal Control
- Oxidation Control Technology
- Auto Online Process Telecast
- Fully automated /By SIEMENS Simatic.

## Filing

- Fully Programmed and by SIEMENS controlled automatic filling lines
- Volume filler range from 100ml to 1,000liters
- Nitrogen Purging
- Automated weight rejection
- 0% Contamination filling procedure

## Storage

- In house 5,000MT base oil Storage **API** 650 tank specification
- 600MT finish Bulk Storage
- 200MT Additives Bulk Storage with International Standards (3 months)
- Empty containers 45 TEU
- Finish Products Containers 30 TEU

## Loading

- Six loading bay with Platform Connections
- International SOP for loading procedures
- Based on FIFO
- Fully Equipped with different size of loading instruments
- Smart Space Management
- Quantity and Quality Assurance
