

Port Developments, Expansions and Smart Port Initiatives in The Indian Ocean for a Viable Future

Port Facilitation to Improve and
Secure Logistics Operations
on Goods

Emmanuelle HENRY : CEO INFOPORT SAS

Etienne BLANCHET : CEO 4SH

Cargo Community System

The must-have for smart port

- **Business oriented benefits**
- **Serving all logistics stakeholders**
- **Concrete gains**

Advantages for each actors

Customs

Freight forwarders

Challenges

Shipping companies

Stevedores

Port authorities

A community system to centralise all the datas regarding all the port activities

Carriage hauler

Key point n°1

Improve the productivity

Key point n°2

Simplify the constraints

Key point n°3

Find specific and concrete advantage for each actor

Key point n°4

Improve the advantages of each actors

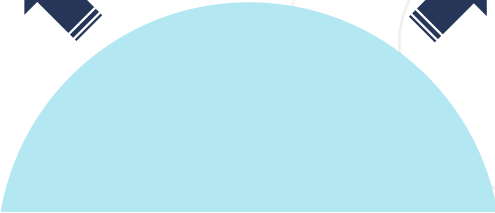

Tools for the smart port

Share information between stakeholders in the transport chain

Reduce processing time

Ensure respect of regulations

Simplify the declaration

Make the transmitted data reliable

Reduce paper (paperless port) and movement

Track goods in real time

Reduce transit times for goods

OUR VISION for a viable futur

- Integrated
- Scalable and tailored
- BUILD & RUN

PCS+TOS included in the **CCS - Integrated system**

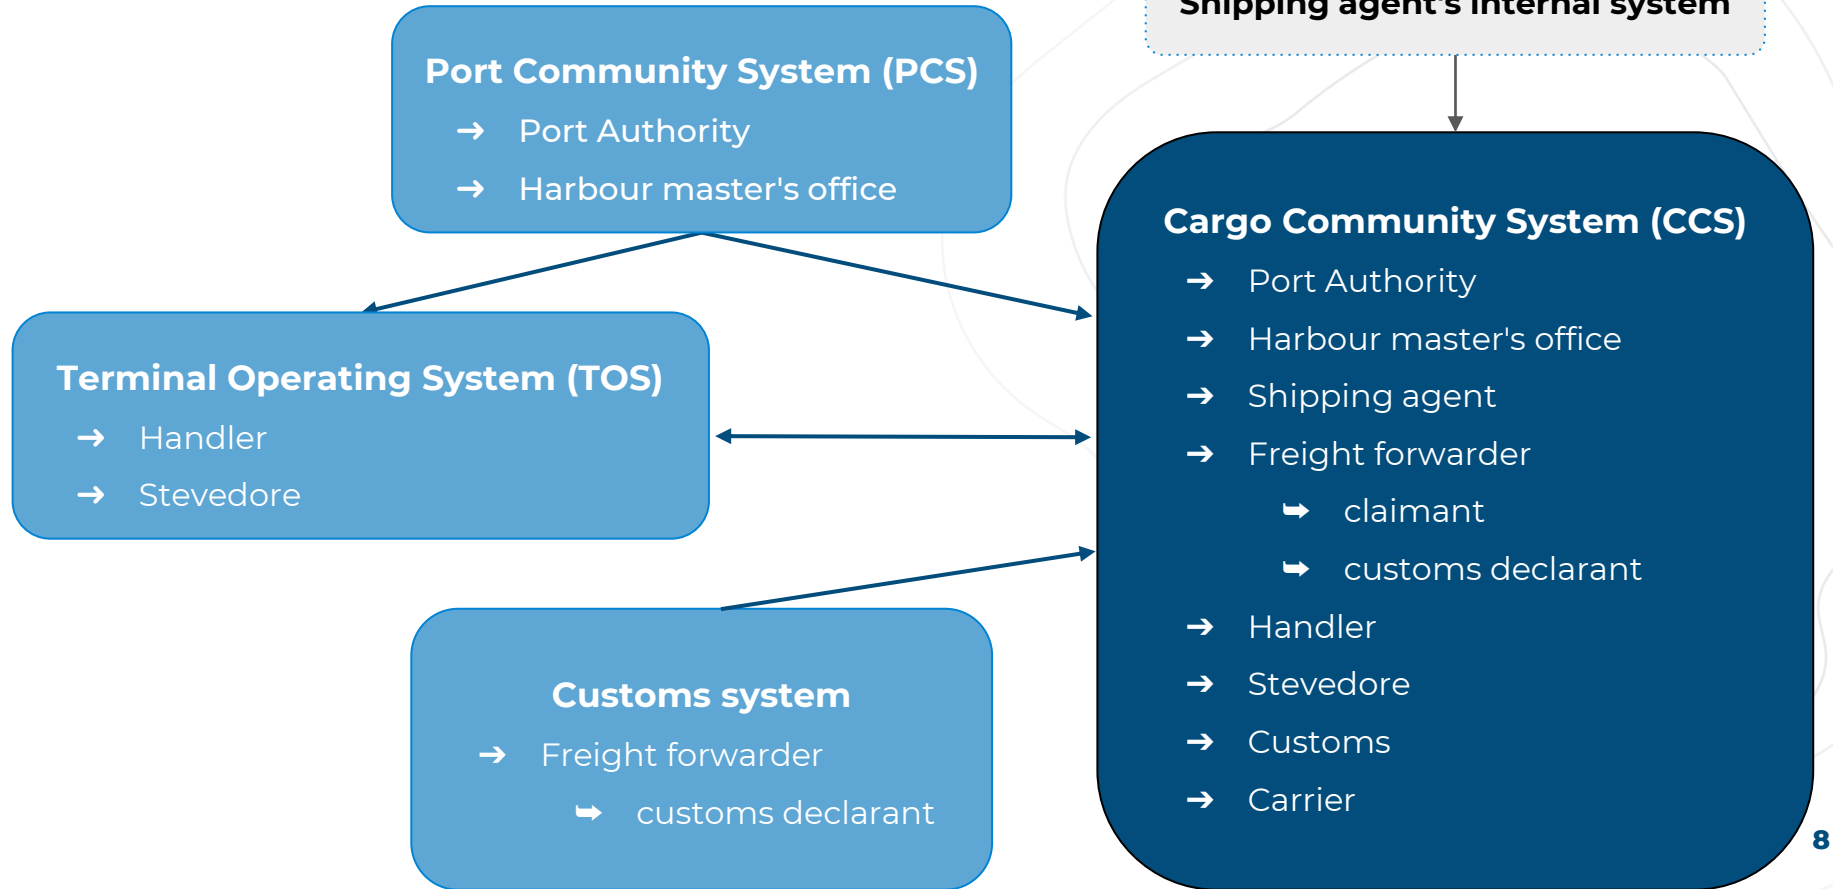

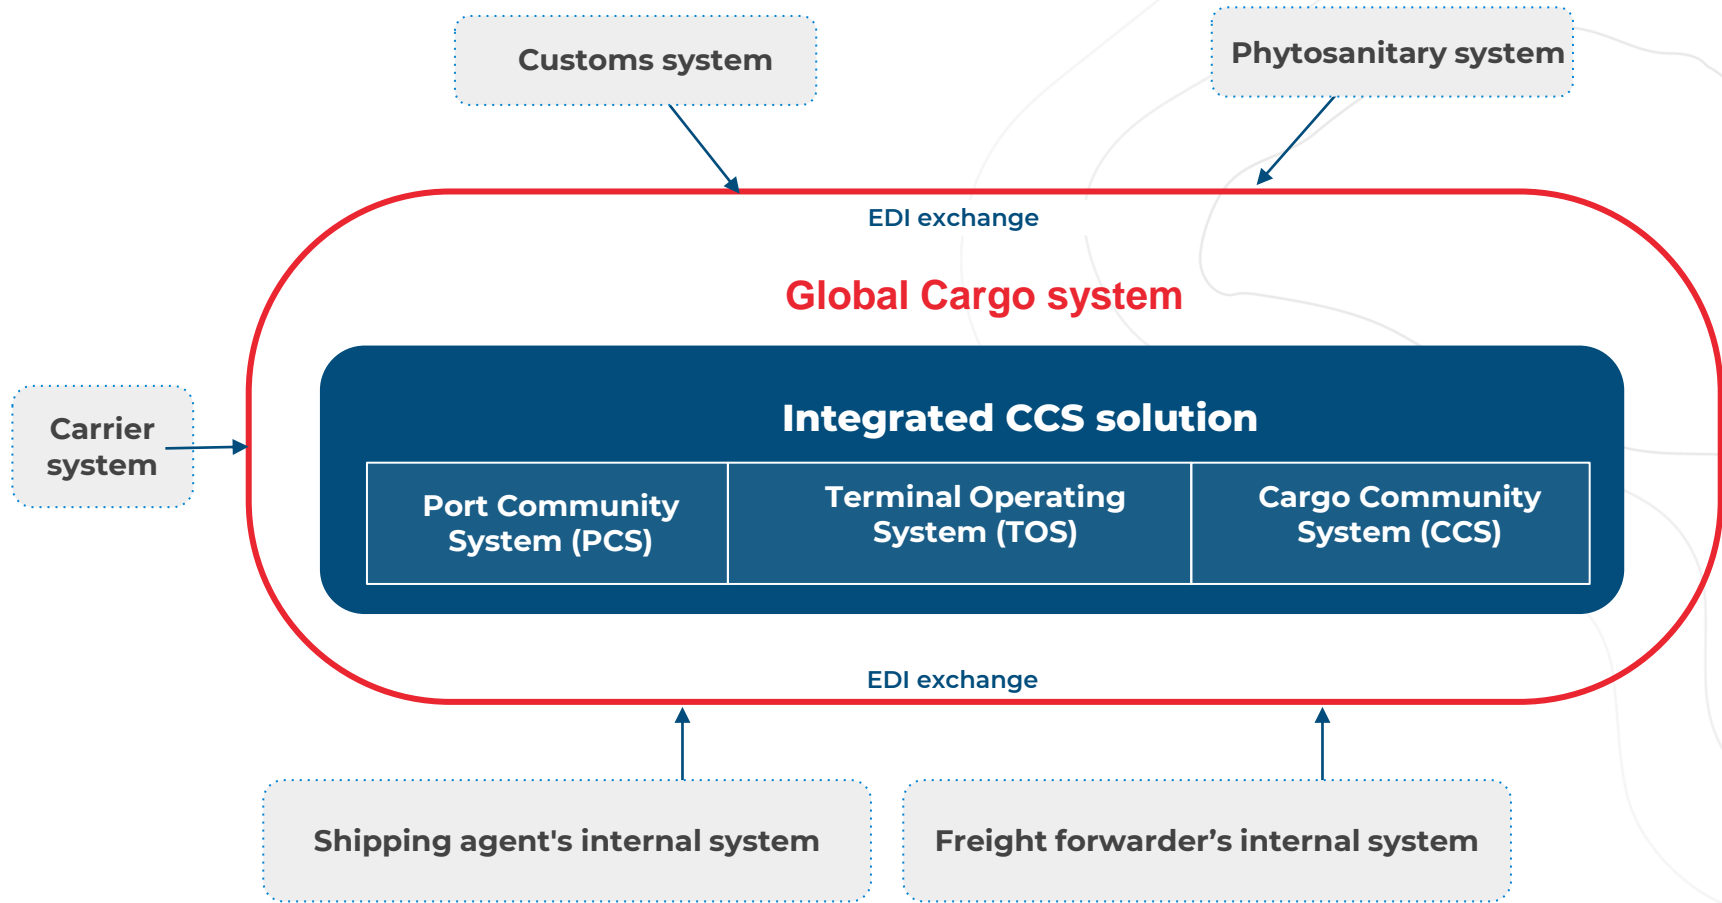

One integrated system

The PCS/CCS/TOS
must be more **integrated** to simplify the deployment
and must be **connected** to the external user system

PCS+TOS included in the **CCS**

Classic vision

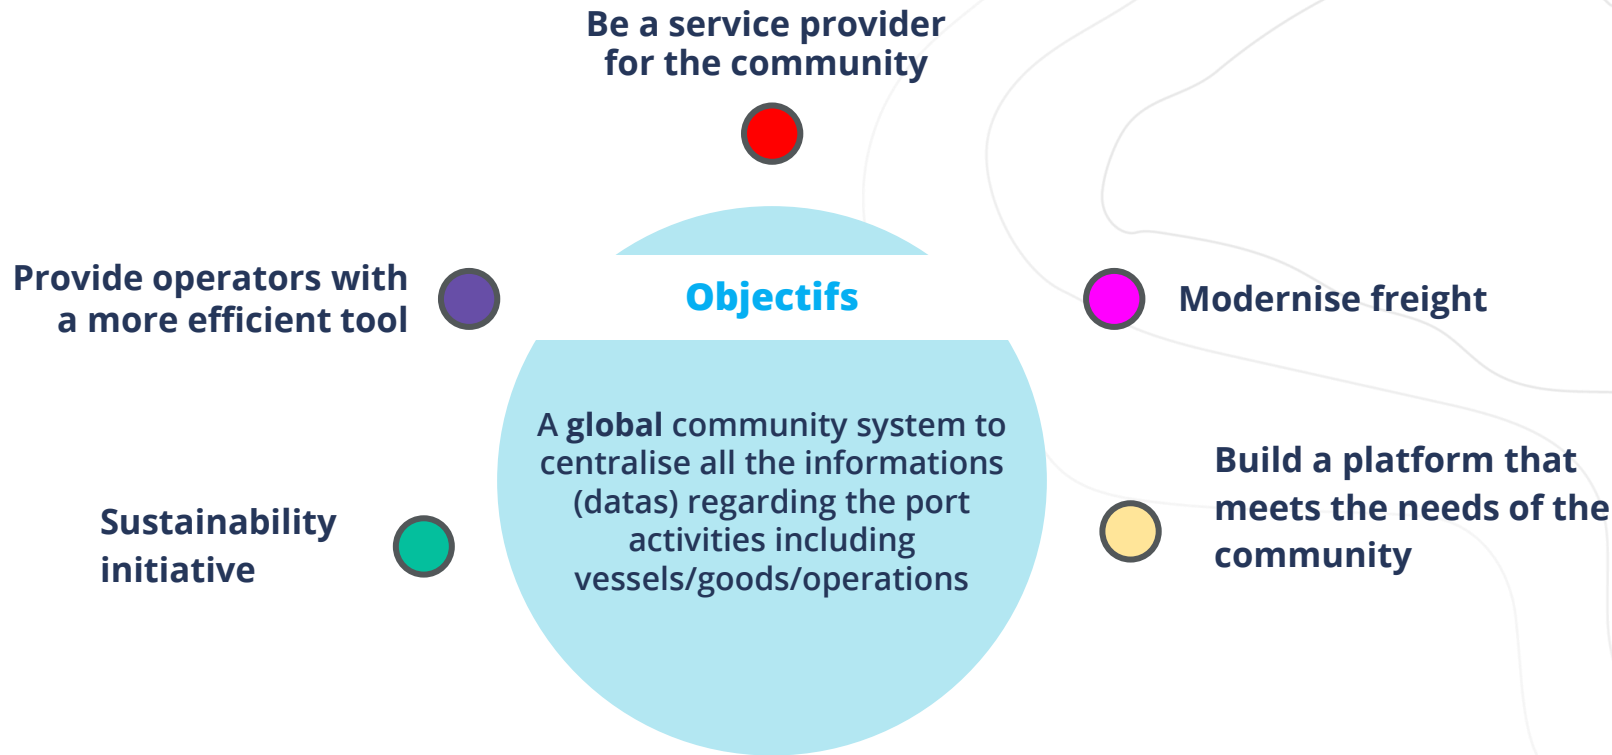

One Port - One System

The CCS must be **tailored** to the port specific processes and **scalable** to achieve business objectives.

PCS+TOS included in the CCS to achieve business objectives

Not only a “software”

A global project “BUILD” to deploy the system
with the community
and “RUN” to operate and support the users

PCS+TOS included in the CCS - Build & RUN

OOOO

Existing solution modern and proven

Processes and business experience (since more than 15 years)

Software specialist to guarantee the BUILD (deploy) and RUN (operate) the system

YOUR CCS

Your global PCS/CCS/TOS System perfectly adapted to your processes and your business needs

One integrated CCS solution (PCS+TOS included in the CCS)

Multi-port, multi-traffic, adapted to small and medium ports

8 months

to understand the specific processes, develop, eventually adapt the existing system, integrate and train the users, then start the system
