Safety Moment

Our Culture of Safety

Safety means everything to us and to our customers

We protect:

Human lives

The environment

Your assets

- Safety is at the heart of what we do. We care for the health and safety of our people and our planet and pride ourselves on being an industry leader in safety performance.
- In addition to protecting our workforce, effectively managing safety risks supports our reputation, improves financial returns, strengthens stakeholder confidence, and increases our competitive advantage.
- These standards assist all managers in delivering on our expectations to protect: our people, our property and equipment, our customers and their cargo, our business partners, and the community. They form part of an overall safety management framework for our facilities to align their local safety processes.

Who we are

APM Terminals is a world class terminal operator present in 75 key locations around the globe.

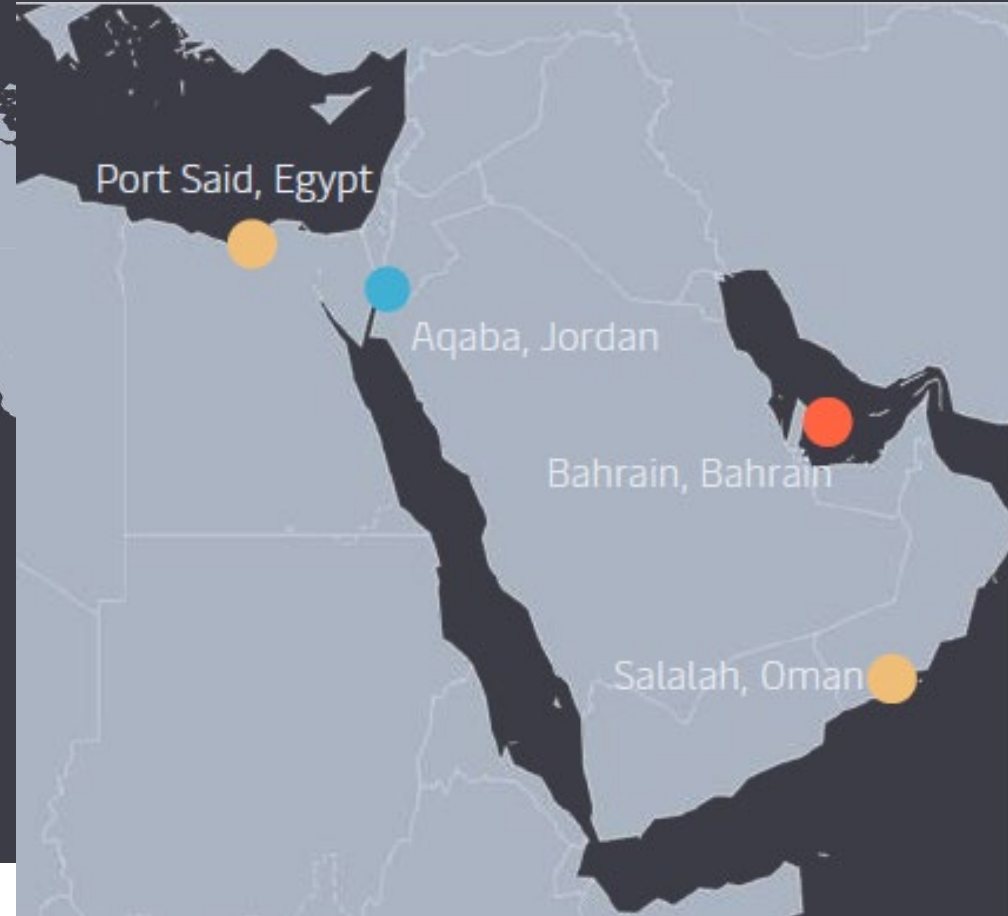

We serve shipping line and landside customers and ensure safe and undisrupted supply chains. We take pride in our strong ties with the local communities where we operate.

With the safety of our people always at the forefront of how we run our business, we develop new products and services that support our customers and create new ways of working that improve our operational performance and increase productivity.

Powered by new technologies, we embrace digitisation to shape the future of port and terminal logistics and enable future growth.

We continue to invest in and develop new facilities, either individually or with our partners, to further strengthen our footprint in relevant markets and to lift global trade.

OUR BUSINESS

Connecting and simplifying global supply chains

A.P. Moller - Maersk enables its customers to trade and grow by transporting goods anywhere.

Maersk works to provide customers with a simple end-to-end offering of products and services, seamless customer engagement and a superior end-to-end delivery network, taking the complexity out of global supply chains.

APM TERMINALS
Lifting Global Trade

Our solutions customized to your needs

Marine Services

Competitive rates, flexibility and efficiency at the berth

Value Added Services

Port-centric yard services tailored to local logistics needs

Gate Services

Easy to use products with accurate information for supply chain partners

Data Services

Better forecasting and planning with data services

Data Services & API Store

Our APIs connect our customers' systems directly to our terminal operating system. This not only supports customers with better forecasting, but is also the quickest and most cost-effective way to stay ahead of your competition.

Here is why our data services create time and cost savings:

Up-to-date and accurate information about container status, vessel schedule, import and export data.

Automatic data transfer reduces human error or outdated information.

Large volumes of data are handled without manual intervention or need for additional resources.

One time set up and maintained and managed by us.
