

(A)^{LS}

AZURITE

EUROPE AND CHINA
WITH CENTRAL ASIA IN THE MIDDLE

- Sustainability
- Broaden the context
- Create value and drive change

Sustainable corridors

Repetitive

Being able to deliver the same product each time, throughout the year without failure.

Performing

Deliver what you promise, at the price sold. Winning the trust of your markets and clients (don't oversell). Resilient operations.

Stakeholders

All stakeholders must be aligned and buy into the product. Not just railways but the whole ecosystem.

Ecology

In the near future there will be demands for greener transports also in Central Asia and along the middle corridor, We need to consider this now.

BROADEN THE MIDDLE CORRIDOR CONTEXT

(A)LS

- Middle corridor as a “Train project”, with railways as driver
- Increase the scope and break down the red tape
- Include the multimodal idea and embrace cooperation across segments and geography
- Integration and clarity of cargo movements
- Consider how we can decrease the impact on our society without losing quality

Create value and drive change

All train, and all “modes”

Multimodal

Integrated

Open (minded)
