Digitalize trade operations and process

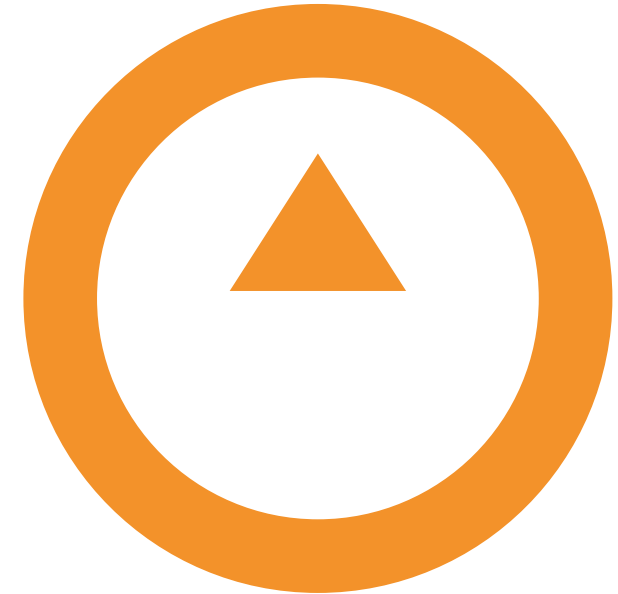

Increase Revenues

**Across visibility of
Trade processes**

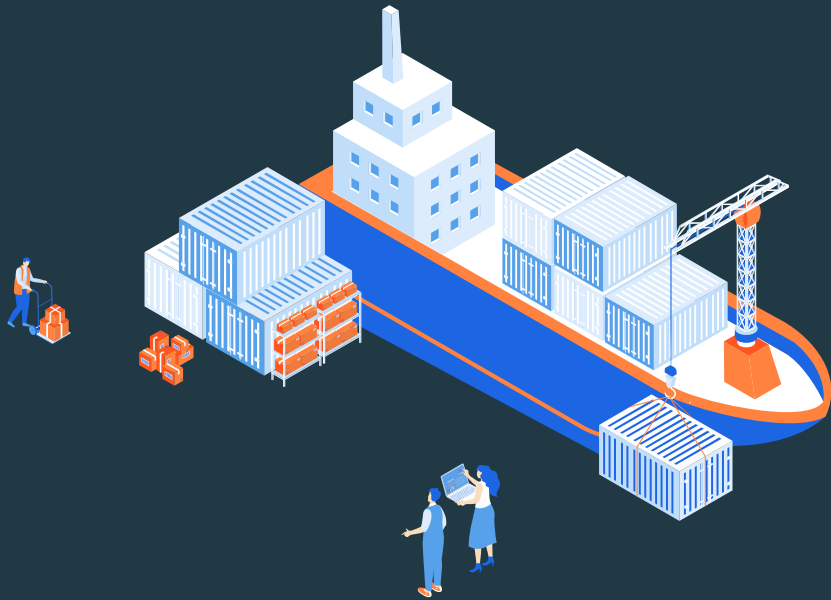

**Trade Facilitation
and reducing time**

Port Community System

A cutting-edge platform designed to facilitate the exchange of information and documents related to import and export consignments within ports, airports, and overland corridors. Our advanced electronic hub provides a seamless and secure platform for public and private stakeholders, streamlining communication and enhancing productivity for faster cargo movements.

Key features

- ✓ Customs Integration with Asycuda
- ✓ Performance Analytics
- ✓ Digital payment Integration
- ✓ Advanced Security
- ✓ Electronic Data Exchange
- ✓ Data Standardization

Key figures

- 10%** of containers exiting the port within 1 day from discharge to release
- 30%** containers exited within 4 days
- 70%** containers cleared within a week
- 100%** ePayment of all port fees and customs duties and taxes by waybill on the same invoice resulting in faster release

Benefits

- Improved efficiency of port operations
- Reduction in processing times and delays
- Increased transparency in trade transactions
- Improved accuracy and completeness of data
- Enhanced security of the supply chain
- Reduction in the risk of cargo theft or smuggling
- Reduced paperwork and manual processes
- Improved coordination and collaboration among stakeholders
- Increased visibility of cargo movements and port operations

And much more!
