

# REDUCING OPERATIONAL COST WITH AUTOMATIC LUBRICATION

**Ron van Os, sales manager port applications**

**GROENEVELD LUBRICATION SOLUTIONS**

**‘All over the world the challenges are the same..’**

Ports are continuously working on safety, efficiency and automated processes

# Automating port operations

If ports can operate without people in cranes and trucks,

- Why would you have maintenance staff,
- Moving around high and slippery surfaces,
- Doing a manual job that a system does much better?

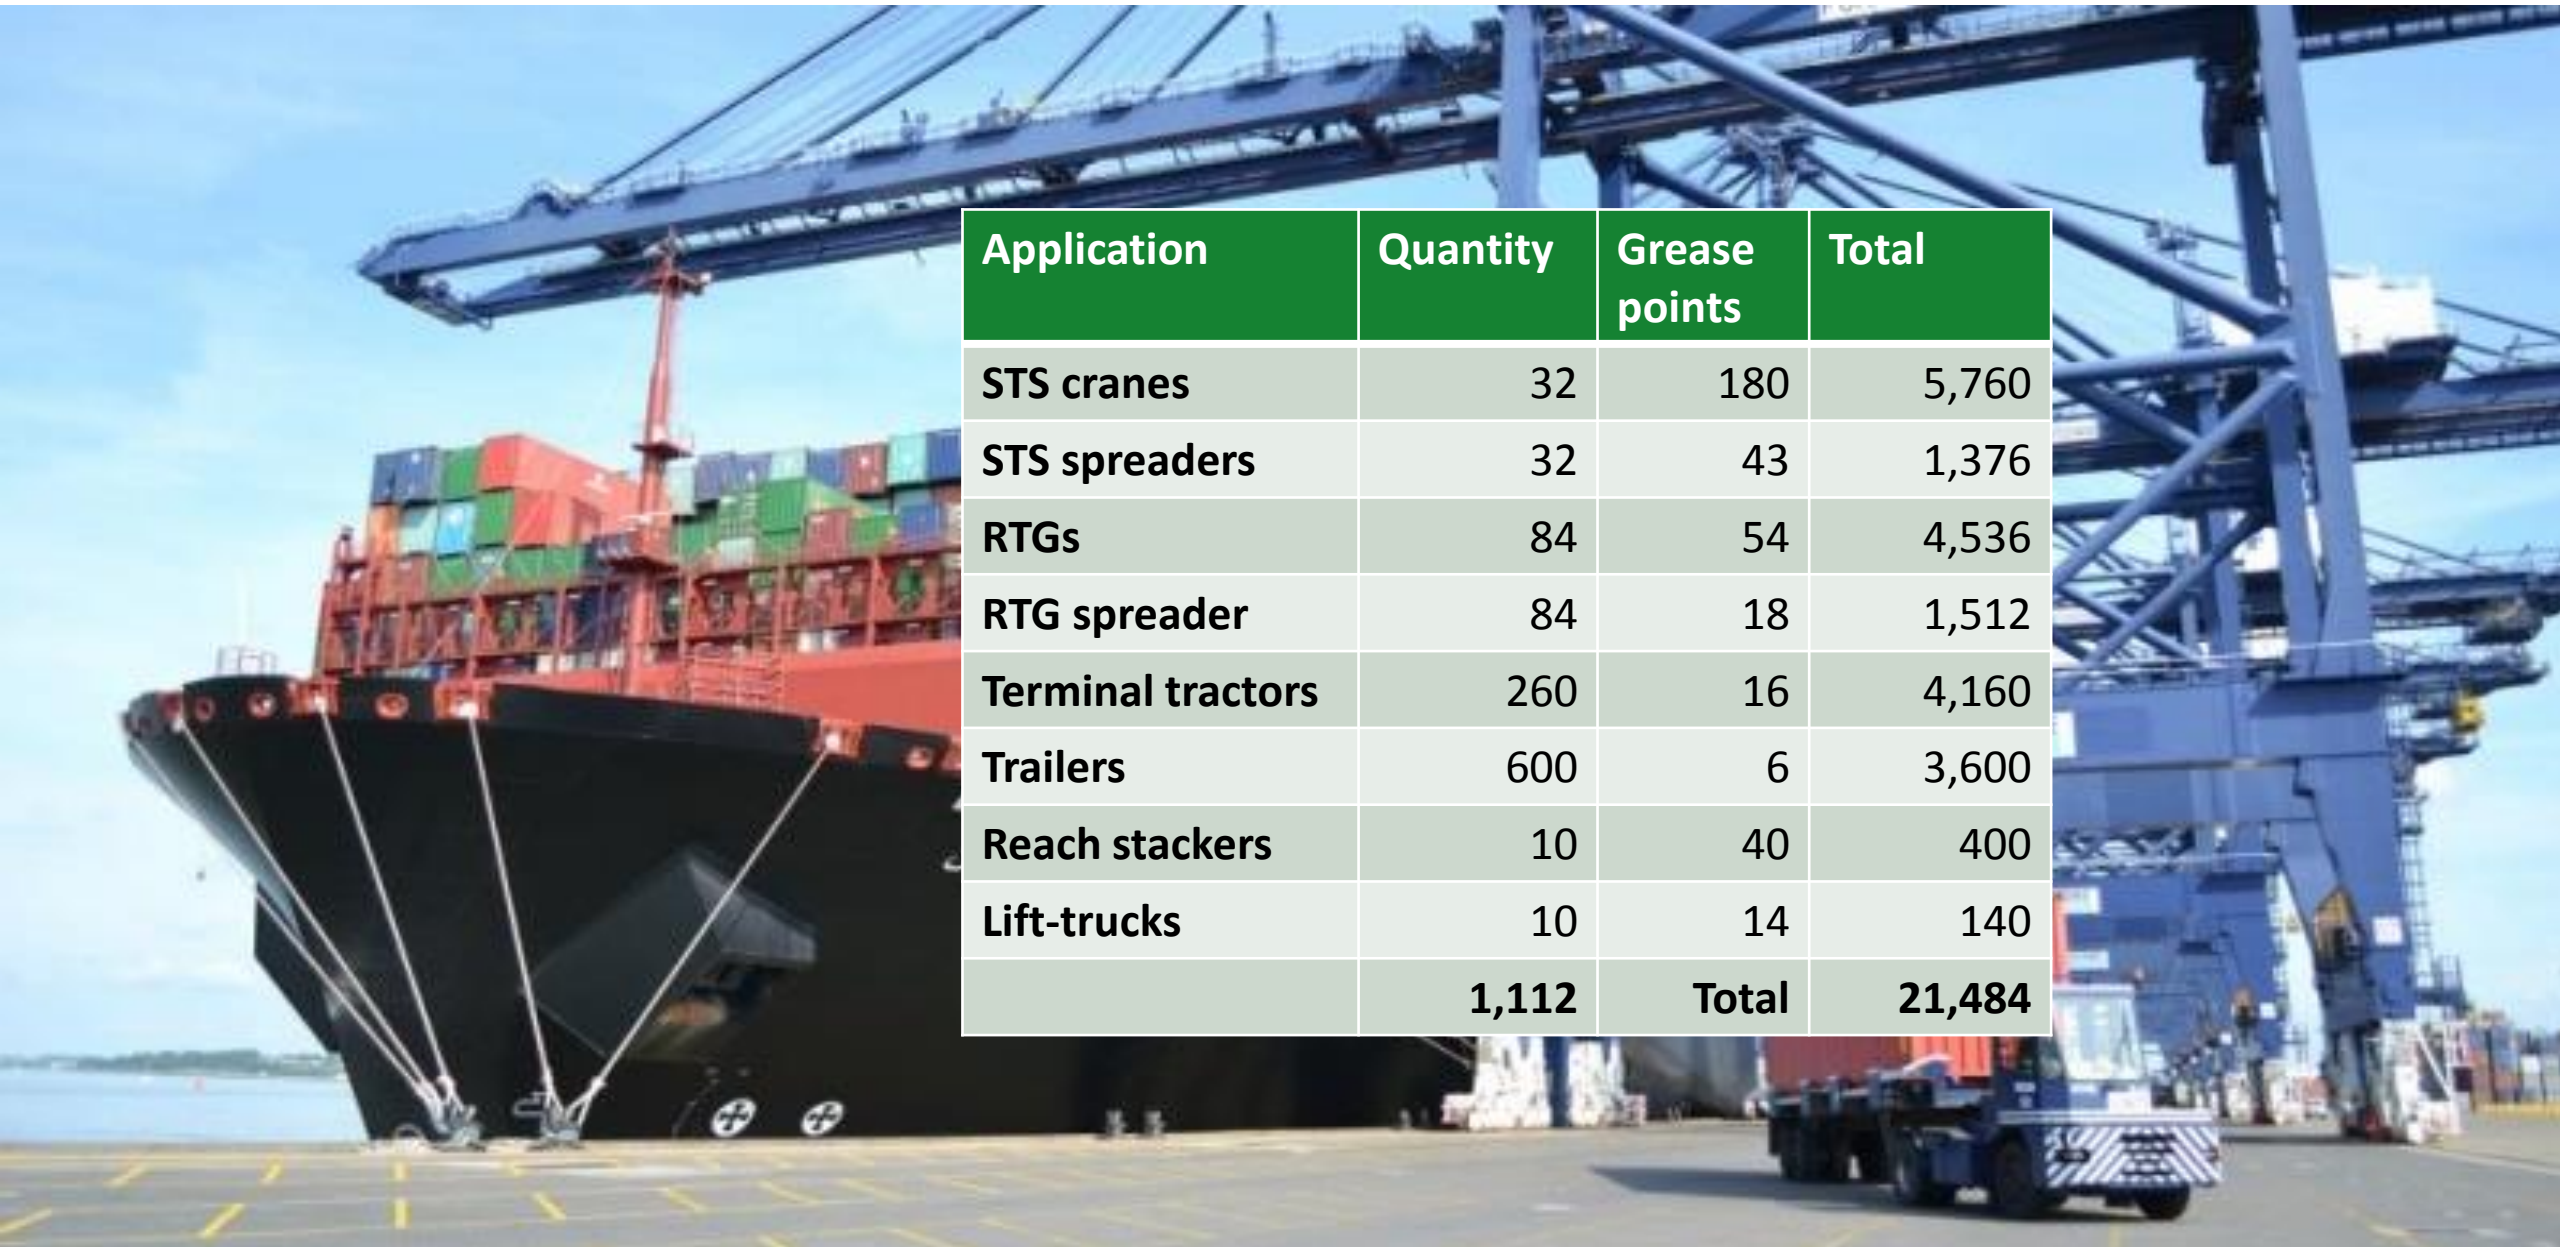

# Manual lubrication?

How many lubrication points are there in a container terminal?

A close-up photograph of a male worker in profile, wearing a black hard hat and a grey safety vest with a yellow reflective stripe. He is wearing blue nitrile gloves and is using a manual grease gun to lubricate a metal component of a large piece of machinery. The grease gun is blue and silver, with a black hose attached. The machinery is dark and appears to be part of a container terminal. The background shows a blue sky with some clouds and other parts of the machinery.

# Example: 4 million TEU terminal

Application	Quantity	Grease points	Total
STS cranes	32	180	5,760
STS spreaders	32	43	1,376
RTGs	84	54	4,536
RTG spreader	84	18	1,512
Terminal tractors	260	16	4,160
Trailers	600	6	3,600
Reach stackers	10	40	400
Lift-trucks	10	14	140
	<b>1,112</b>	<b>Total</b>	<b>21,484</b>

# Why do we need to lubricate?

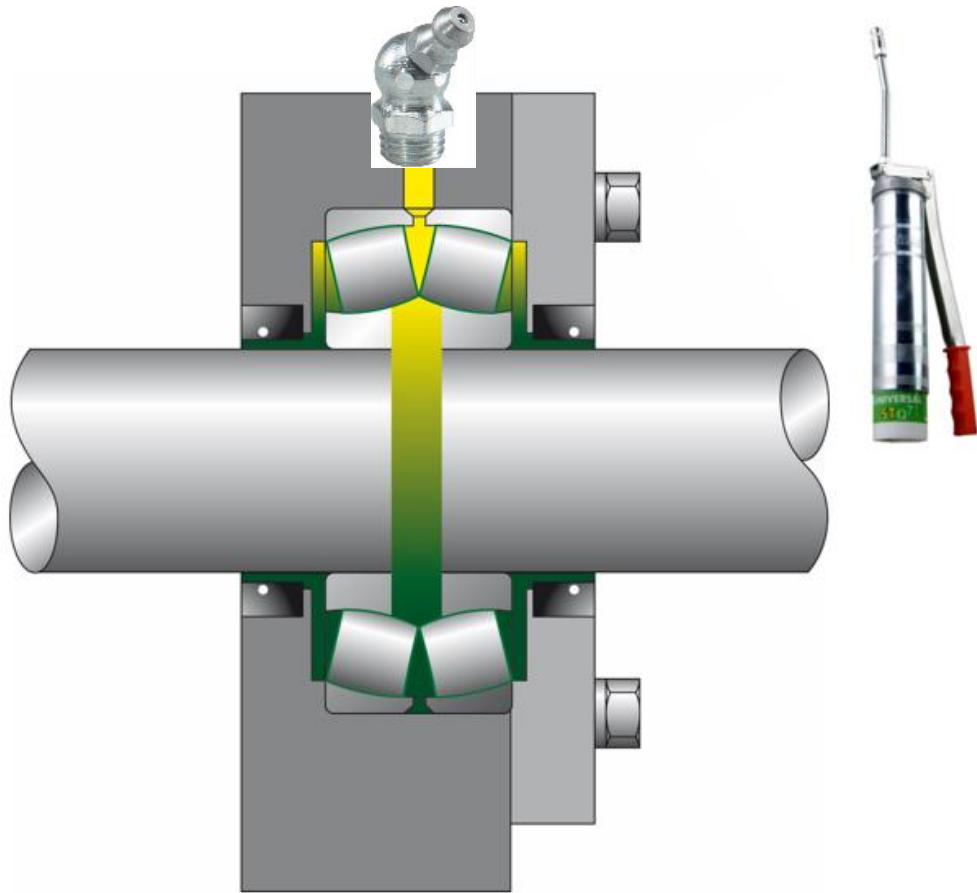

- ➔ To prevent (metal to metal) contact between two moving components (a thin layer of grease)
- ➔ To seal (to keep out dirt, water, cleaning agents etc.)
- ➔ To cool and reduce friction
- ➔ To lubricate seals (to maintain tightness)

# Manual versus automatic lubrication

Lubrication points:

- ➔ Headblock: 20
- ➔ Spreader: 36
- ➔ **Total: 56**

## 7.0 SERVICING AND MAINTENANCE INSTRUCTIONS

### 7.1 Recommended Preventive Maintenance Schedule

S/N	Description	Initial	Daily	Weekly	Monthly	Quarterly	Annually
9	Greasing of Telescopic sliding surface.	X	-	-	X	-	-
10	Greasing of twistlock pin, spherical washers & landpin sliding surfaces.	X	-	-	X	-	-
11	Greasing of drive chains and idler wheel bearing.	X	-	-	X	-	-
12	Greasing of hydraulic cylinder rod end bearings & exposed piston rods.	X	-	-	X	-	-

## Back to the container terminal example:

- ➔  $21,484 \times 2 \text{ min} \times 12 \text{ (monthly)} = 8,600 \text{ hrs/year}$
- ➔ Labour € 30 per hour makes € 258,000.- per year
- ➔ 25 years: € 6,450,000 (€ 300/greasing point)
- ➔ ***Not including the value of uptime and extra grease?***
- ➔ ***And less component replacement?***

# Twin

1. Parallel system
2. For heavy duty applications
3. Low operating pressure
4. Virtually unlimited number of greasing points
5. Virtually unlimited lengths/distances

# Lubrication solutions – product range

# Lubrication solutions installed on different applications

# A selection of OEM partners

# Terminal operators with Groeneveld's solutions

# TIMKEN

Part of the Mechanical Power Transmission division

# Groeneveld worldwide sales & distribution network

# Production facilities in Italy

97691 SL/OS

# Groeneveld distribution strategy

## OEM Sales

- ➔ Focus on OEMs
- ➔ Solid commercial and technical support
- ➔ Co-design and co-development

## Direct and Indirect Sales

- ➔ Direct sales to key accounts
- ➔ Fully owned sales and service organisations in 14 countries
- ➔ Independent distributors in other areas
- ➔ Hybrid model of branches and distributors

# Groeneveld – Your missing link in port automation

## *Did you automate everything?*
