

Development of the intermodal transport in Romania, present situation, challenges and future

27 May 2016

Johan de Bot

- Growing up in InlandBarge world in the Netherlands
- Sailed on container barge
- Chartering in barge world
- Building on Inland terminals Netherlands/Germany
- Doortodoor Black Sea<>North Sea
- First time in Romania in 2010 to assess intermodal opportunities

Even though very well located and with significant potential to develop intermodally, still lots of bottlenecks due to....

Danube/ Danube ports problems

- Bad connecting infrastructure
- Old handling equipment
- Improper water infrastructure, draughts of less than 2.5 m on some sectors during dry season
- Lot of bureaucracy especially on some borders
- High ports/canal costs

Romania has a big intermodal/transport potential

Traba Logistics

Building European Trimodal Network

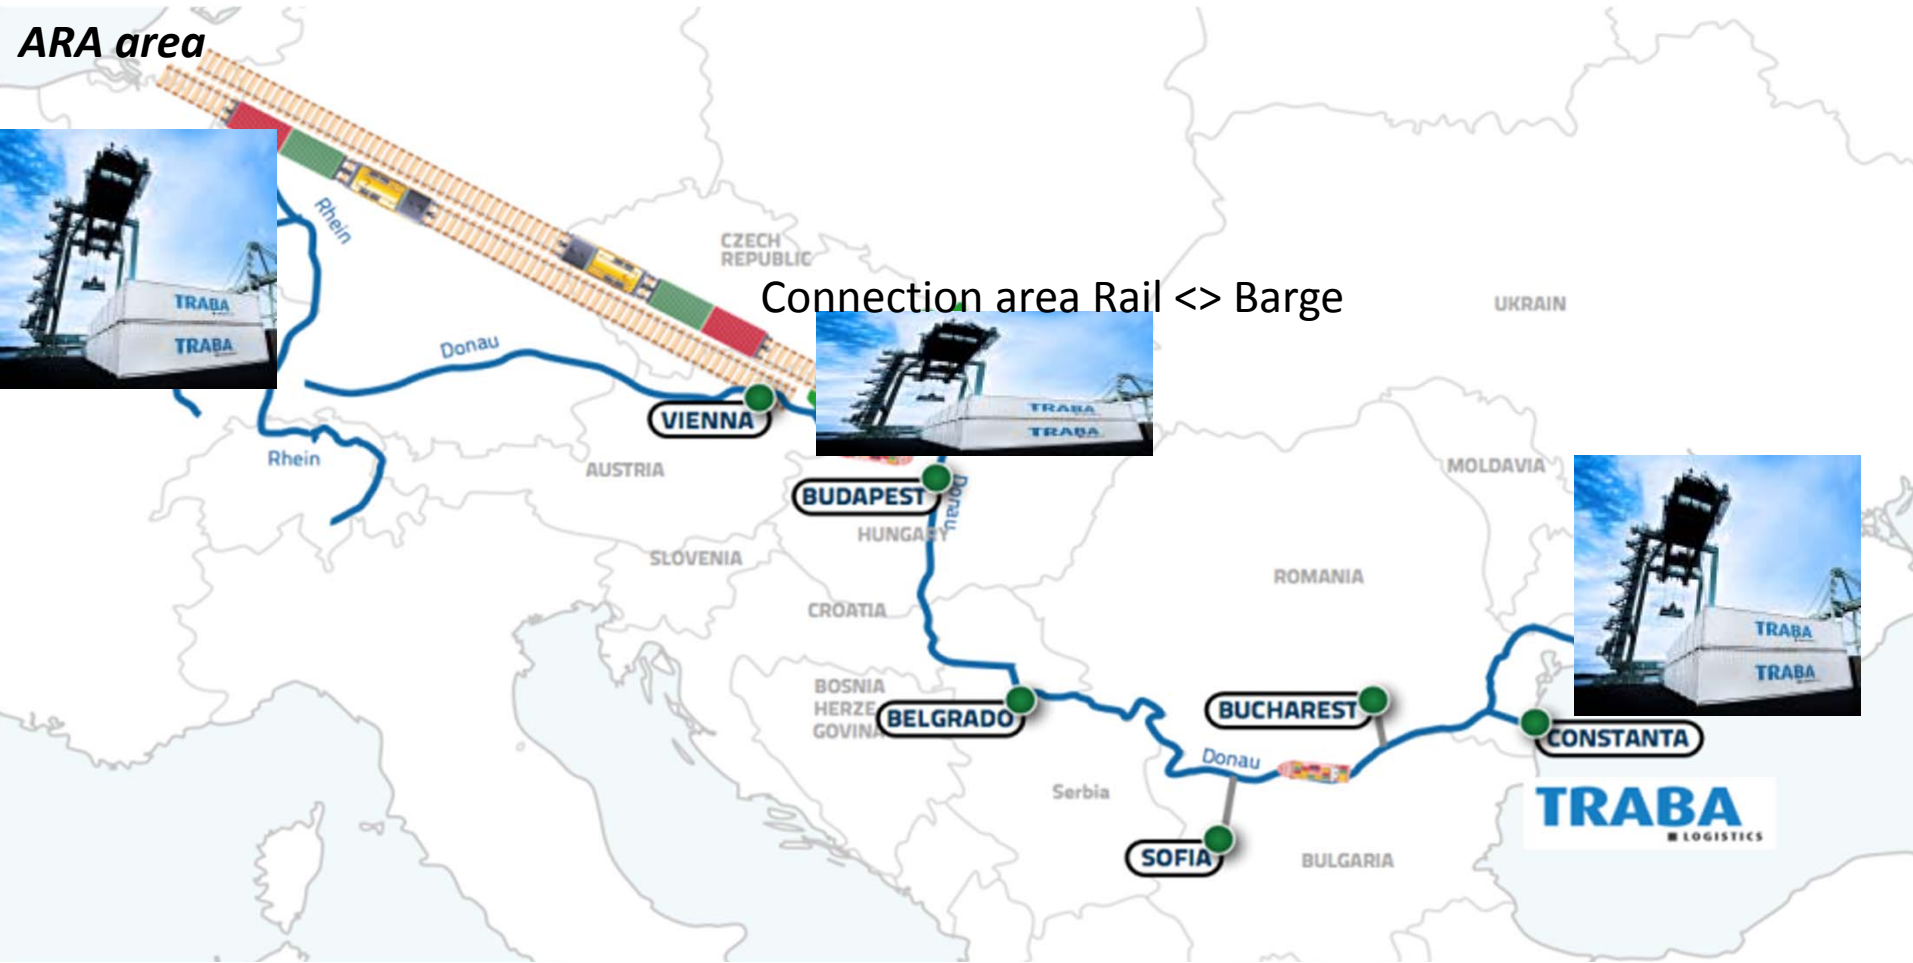

- Now is the time to do it
- Truck, Rail, Barge combined
- Continental flows with 45 ft containers
- Combined with deepsea
- One window for client
- Offices in Netherlands, Romania and Serbia

TRABA

LOGISTICS

ARA area

Window Danube Container Line

14 days Round-trip CTA <> Vienna

TRABA ready to open a Danube container line

- On same system as Rhine
- Using specialized self propelled vessels
- Navigating 24 h a day
- Using a good track and trace system
- In close cooperation with the clients

What to do

- Dredging Danube
- Building infrastructure
- Building inland terminals
- Promote Trimodal Transport

What we need

- Finance
- Network
- Collaboration of Government/EU

This product is the future for transport in Europe

- Important developing now during the crisis
- Working together with good companies in the market
- Collaboration of Government/EU

Thank You!

Always at your service

DoortoDoor from Black Sea <> North Sea
