|  Benin | | | | | | |

What we do...

Integrated Portfolio

Webb Customs

Revolutionizes the entire Customs clearance process, through the integration of AI. Digital Customs is fully integrated across the Trade spectrum.

Webb Single Window

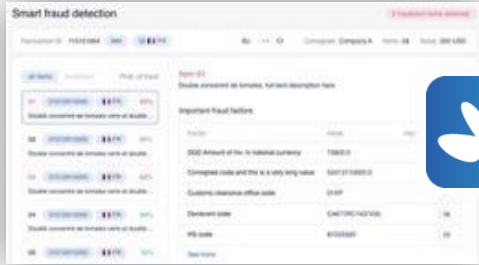

Interconnecting all stakeholders involved in foreign trade by enabling them to perform all trade procedures on one single digital platform.

Electronic Payments and Payment gateways

The Online Payment system manages invoices, connects payment entities and audits payments from any system. Comprising of a unique API and UI specifically designed for Governments, Banks, Traders and Citizens.

Integrated Portfolio

Webb Risk Intelligence

A comprehensive multi-agency solution that manages the entire lifecycle of risk management powered by Artificial intelligence, predictive analysis, and data-driven analytics.

Webb Ports

(Port Community System and Maritime Single Window)

An electronic platform which manages all logistics processes and exchange of information between public and private stakeholders.

Webb Transit Tracking

Fully-fledged versatile GPS/GSM transit cargo tracking specifically designed for Customs control offering transparency, compliance and monitoring while preventing cargo losses and tampering.

Integrated Portfolio

Scanning Services

Our non-intrusive scanning solutions improve efficiencies and accuracy across the scanning ecosystem.

Webb Inspection

Testing, inspection and certification (TIC) services cater to a range of industry sectors, a variety of standards and government regulations. These range from agriculture, minerals, petroleum, chemicals, and consumer products.

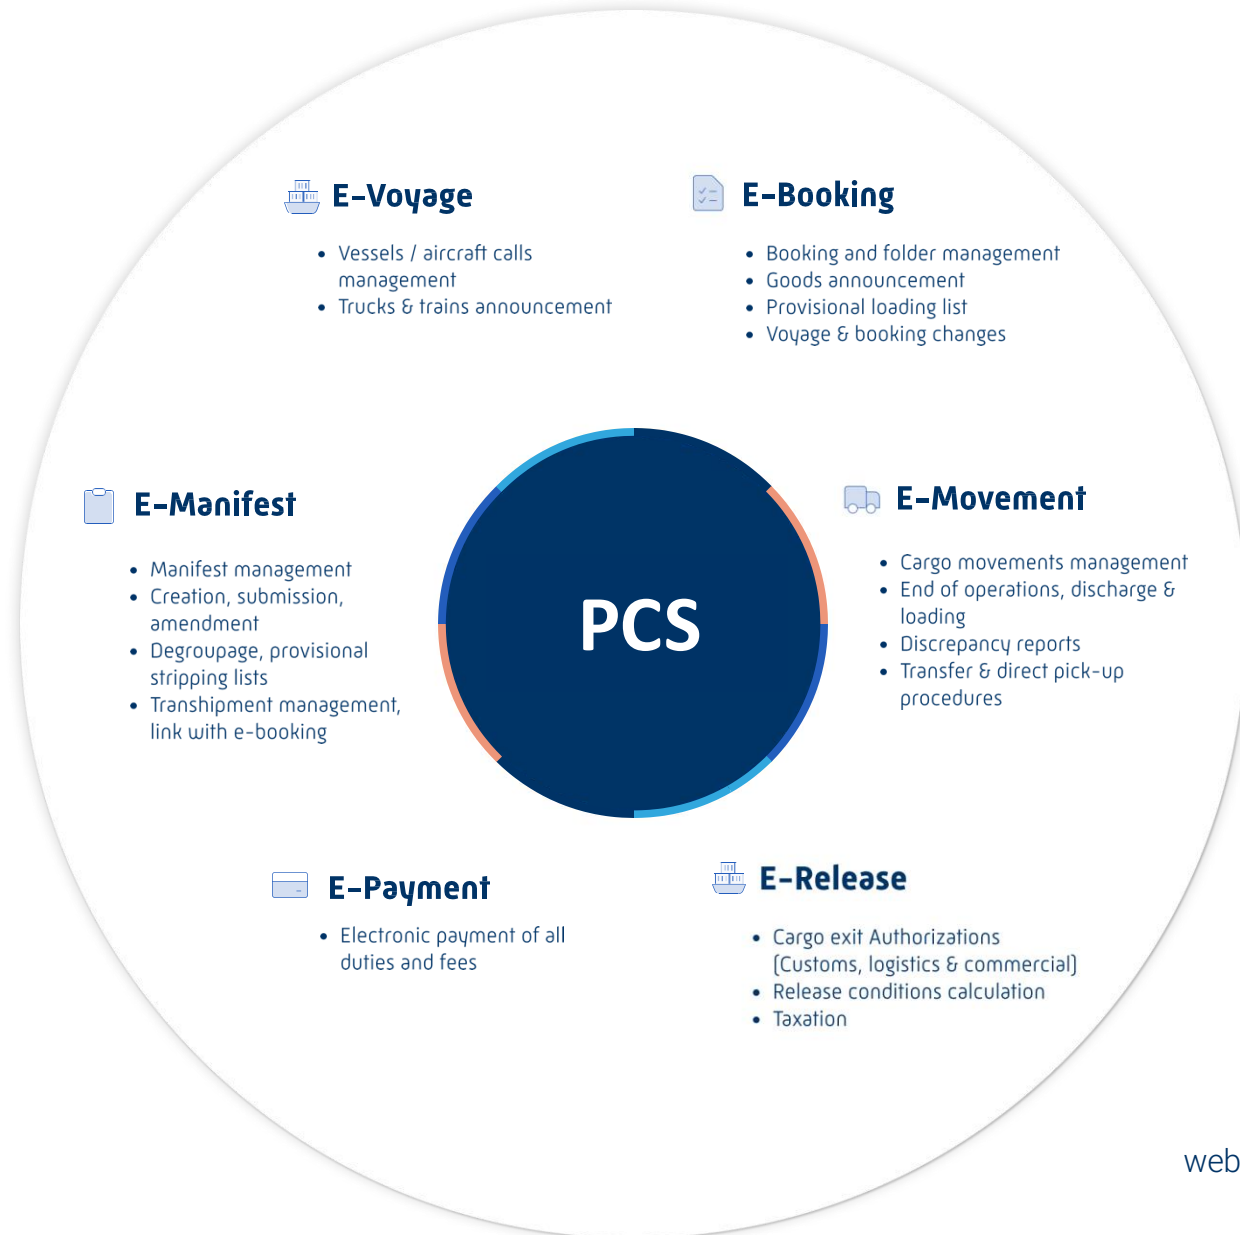

Webb Valuation

Smart Classification and Valuation increases Customs revenue through the identification of under-invoicing instances and misclassification of goods, in line with WTO recommendations.

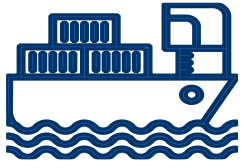

WEBB PORTS

A Port Community System (PCS) that manages interactions between systems used by port authorities, customs, and terminal operators, from data exchange and logistics through billing and payment.

Impact of Webb Ports

- Reduced congestion and delays
- Provides visibility of the entire process from gate-in to gate-out.
- Provides an electronic collaborative hub that onboards all the port stakeholders in the port via API (interface) or integration.
- Impacts on Logistics Performance Index.
- Plugs into existing systems to provide value added services (ePayments, eMovement, eManifest, eBooking, eRelease, eVoyage.
- Reduced turnaround time for traders
- Improved collaboration among port stakeholders (eNotification)
- Business intelligence integrates data from various systems providing high level of reporting and analysis
- Facilitates deployment of automated tools such as eGates, mobile devices and automatic reconciliation.

E-Voyage Module

(Maritime Single Window)

- Management of voyages
- Announcement, Approval and Entry/Exit movements
- Management of co-loaders, link with manifest
- Notification to stakeholders
- Clearance in and clearance out
