

# GATE MANAGEMENT SYSTEMS

Increasing productivity, safety and security by Automation

---

Trans Middle East

Tehran 25-January-2017

**CAMCO TECHNOLOGIES**

# Agenda

---

- Introduction
- What is Gate Management?
- Gate Management Systems
  - Manual
  - Fully Automated
- Conclusion

# Camco Technologies – [www.camco.be](http://www.camco.be)

---

Prime partner to  
container, ro-ro & rail  
terminals for process  
automation solutions  
based on  
visual and micro-location  
technologies

# Automation of the handover process of containers

## Camco solutions:

- 1 Crane OCR: BoxCatcher & SideCatcher
- 2 Truck OCR
- 3 Rail OCR
- 4 Crane OCR
- 5 Landside transfer points: Grid Kiosks
- 6 Interchange control
- 7 PDS

# Solutions

## ◦ Gate automation

- Truck OCR Portals
- Pedestal
- LandSide Transfer Point kiosk
- GOS (Gate Operating System)

## ◦ OCR-assisted rail handling

- Rail track OCR Portals
- TGO (Train gate operator)

## ◦ Crane OCR

- High-end BoxCatcher
- Basic SideCatcher (Sill beam)
- COS server software

## ◦ PDS/RTLS Solutions

- DGPS/INS/UWB distance Ranging
- VMT client software for CHE's (strads,TT's,..)
- CHEOPS Server software

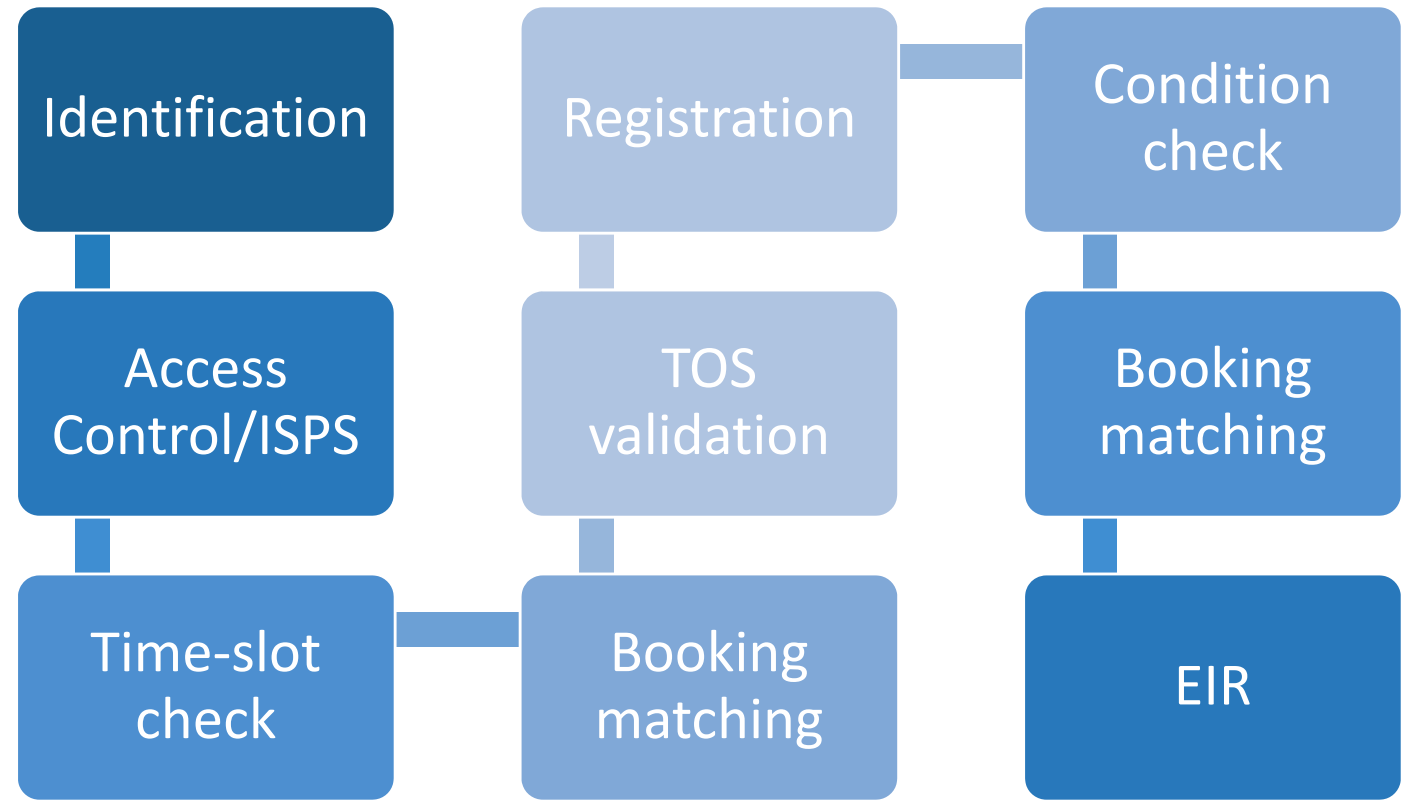

# Gate Management

# Gate Management

---

**Slide 7**

---

**JT1**

Equipment Interchange Receipt (EIR)

A document transferring a container from one carrier to another, or to/from a terminal.

Julien Theys, 12/10/2016

# Gate Management System

# Gate Mgmt System – How to start?

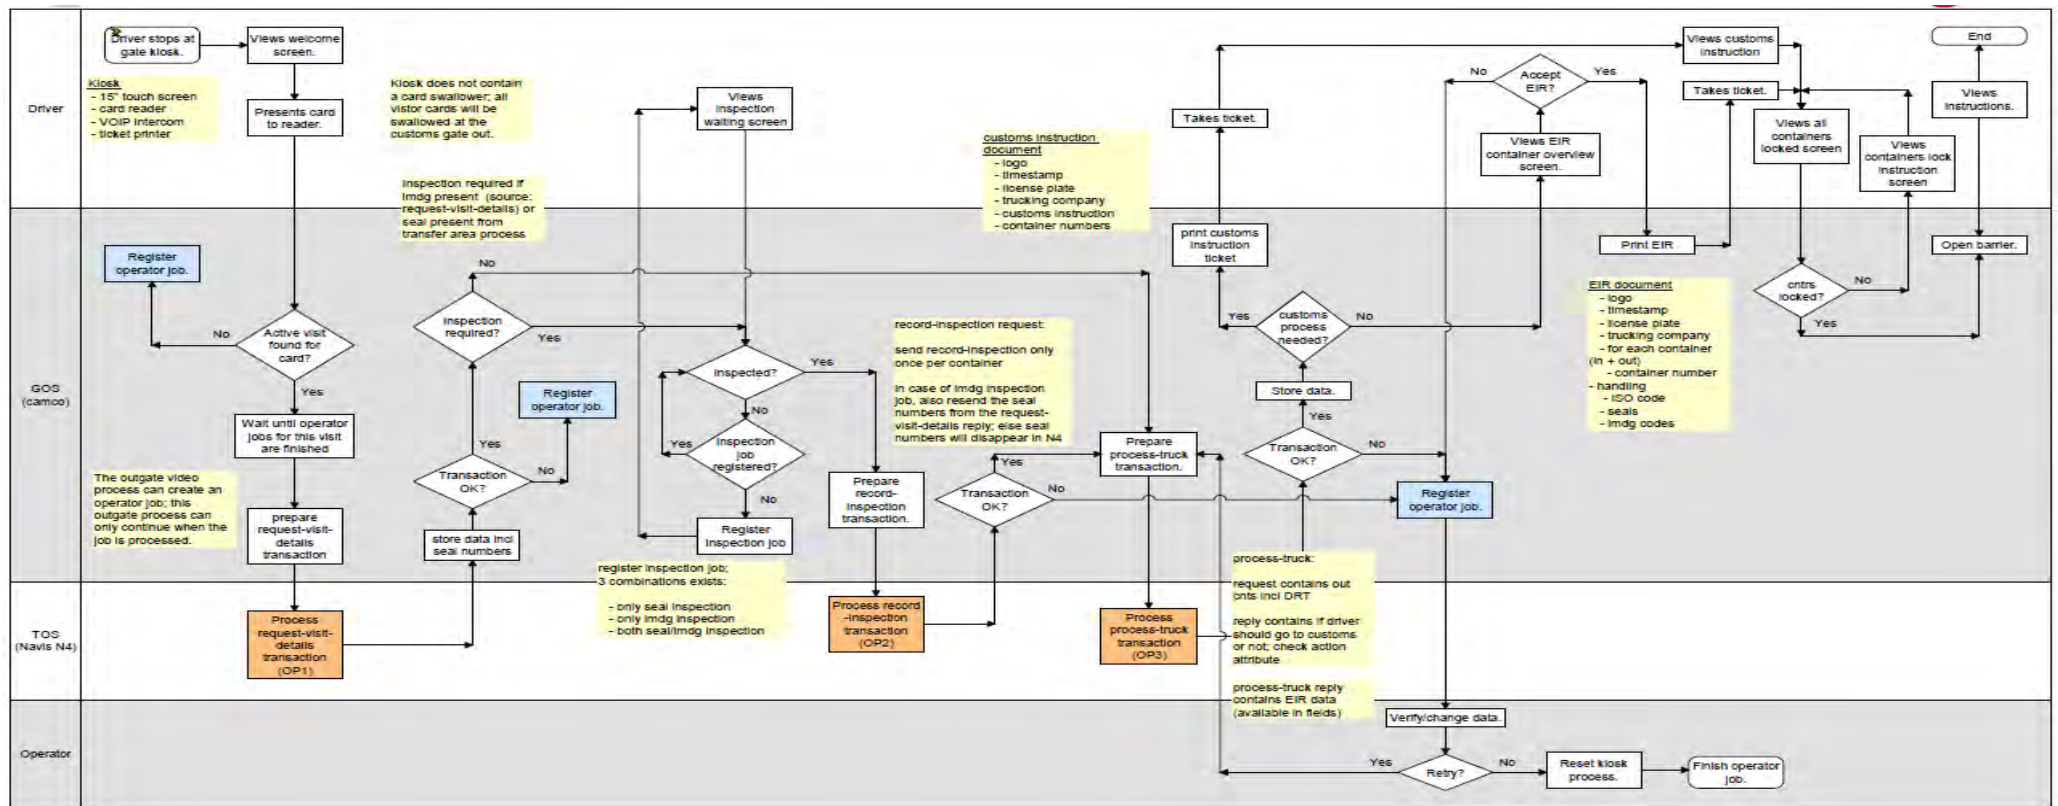

---

GATE MANAGEMENT SYSTEM = COMPLEX COMBINATION

- Process flows
  - P-check
  - A-check
- Interfaces with Host systems
  - Access Control
  - TOS
  - Customs
- Lay-out of gate area
  - Space constraints
  - Green field vs Brown field
- Local regulations, norms, habits

# Business Process Modelling

# Simulation

# Simulation

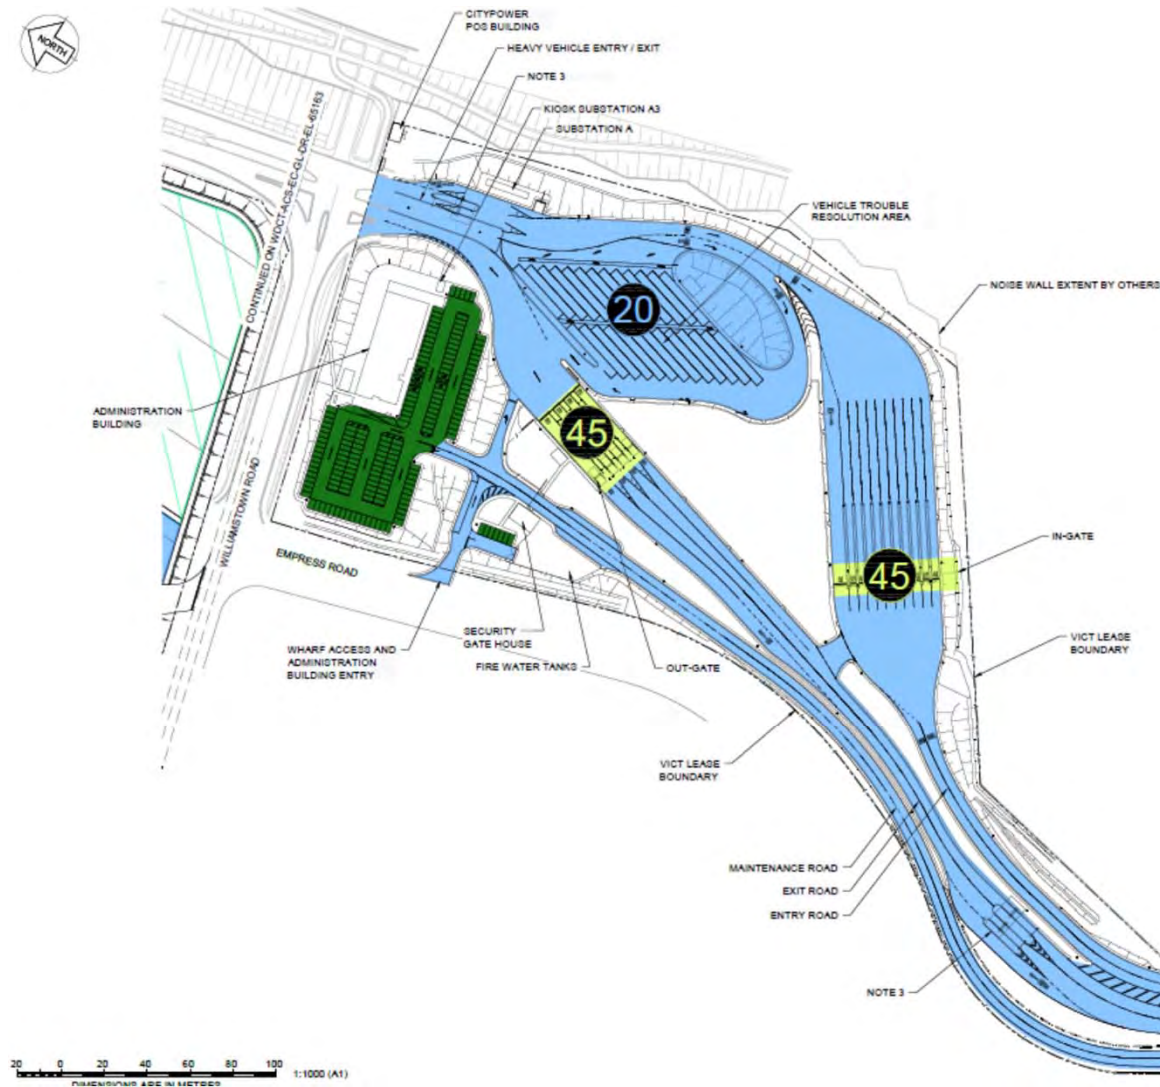

CAMCO TECHNOLOGIES

Innovate your Terminal

# Brown field

AVERAGE LUX LEVELS

8 LUX	
10 LUX	
20 LUX	
40 LUX	
49 LUX	
NOTE 1	

**NOTES:**

- CAR PARK AREA LIGHTING TO COMPLY WITH AS/NZS 1158.3.1:2005, CATEGORY P11 B.
- ALL LIGHT FITTINGS SHALL BE LED TYPE WITH FLAT GLASS OPTICS.
- IMMEDIATE LIGHTING REQUIREMENTS FOR OCR FACILITY TO BE DETERMINED.

CONTINUED ON W0CT-ACS-TA-GL-DB-EL-65161

# Gate Management Systems

## Manual

# Gate Management Systems - Manual

---

## HIGH COST

- Each lane is manned – gate operator

## TIME-INTENSIVE

- Timely gate processes, paperwork

## INACCURATE DATA

- Manual data input – people make mistakes

## FRUSTRATED TRUCK DRIVERS:PERSONNEL

- People make even more mistakes

## MANUAL DAMAGE-, SEAL-, IMDG DETECTION

- Unsafe environment for clerks

# Gate Management Systems

Automated

# Gate Management System – Data

---

## Automatic Identification

- Container number
- ISO code
- License plate number
- Dangerous Goods Labels classification

## Automatic Detection

- Container location (front, mid, back)
- Door direction
- Seal Presence
- Reefer detection

## Condition recording

- Condition Checking
- Storage for later retrieval
- Damage Claims management

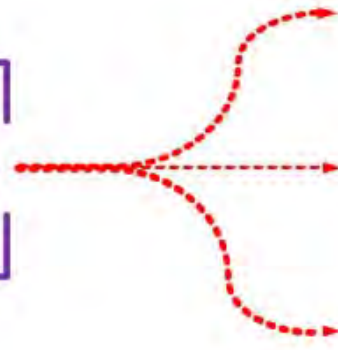

# Automated Gate – OCR portal system

Typical set-up:

- Limited # dynamic OCR portals
- Gate lanes with kiosks + traffic barrier
- Remote Help Desk/Exception Handling office

Inbound OCR portals

In-Gate lanes

Exit-Gate lanes

Outbound OCR portals

**Ngqura Container Terminal, Port Elizabeth, South Africa**

# Automated Gate – In-lane OCR system

---

Each gate lane is equipped with OCR camera system

- High Maintenance & Support costs
- Needs lots of space
- Lock system required: only one truck can enter gate lane
- Expensive & Mediocre results

CAMCO TECHNOLOGIES

# Automated Gate System - Components

---

WHAT MAKES A GATE AUTOMATION PROJECT SUCCESSFUL?

# Gate Automation

---

- Vehicle Booking System
  - pre-booking
  - pre-announcement
- OCR Camera systems
  - visual proof of exact condition
  - automatic identification
  - automatic detection
- Driver Kiosk systems
  - identification of driver
    - ID Card system
  - registration & validation
    - matching booking
  - seal check
    - entry of seal number
  - TID & EIR ticket

# Gate System - Components

## OCR CAMERA PORTAL

- Condition recording
- Identification:
  - Truck
    - License plate number
  - Container(s)
    - Container number
    - ISO code
    - IMDG Label classification
    - Container location
    - Door direction
    - Seal Presence

# Gate System – OCR Camera Portal

UNION TECHNOLOGY

# High Resolution Images – Trailer

# High Resolution Images - Rear

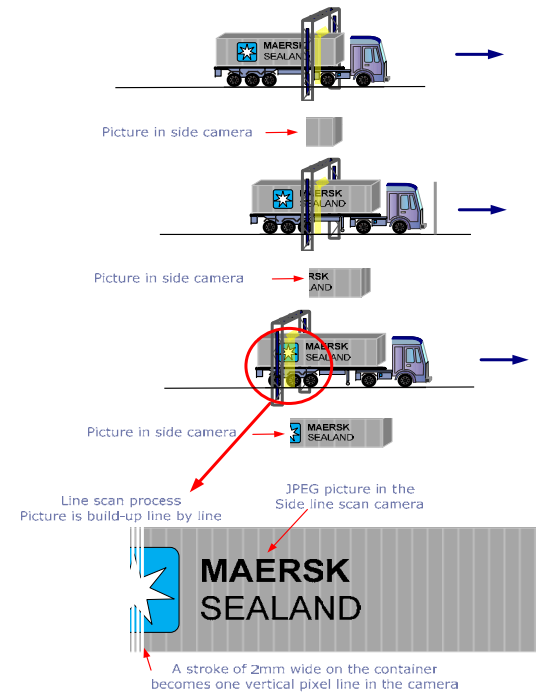

# Making the Images

2D Stitching

Line scan Camera technology

# Gate System - Components

---

## KIOSK/PEDESTAL SYSTEMS

- Drivers process own registration

# Gate System – Kiosk system

# Gate System – Kiosk system

**APM TERMINALS** Welkom

Hou uw CargoCard voor de kaartlezer.

Ik heb geen CargoCard.

# Gate kiosk Systems

---

## KIOSK SYSTEMS

- Modular
- Flexible
- Easy to maintain & support
- Ergonomic

# Gate System - Components

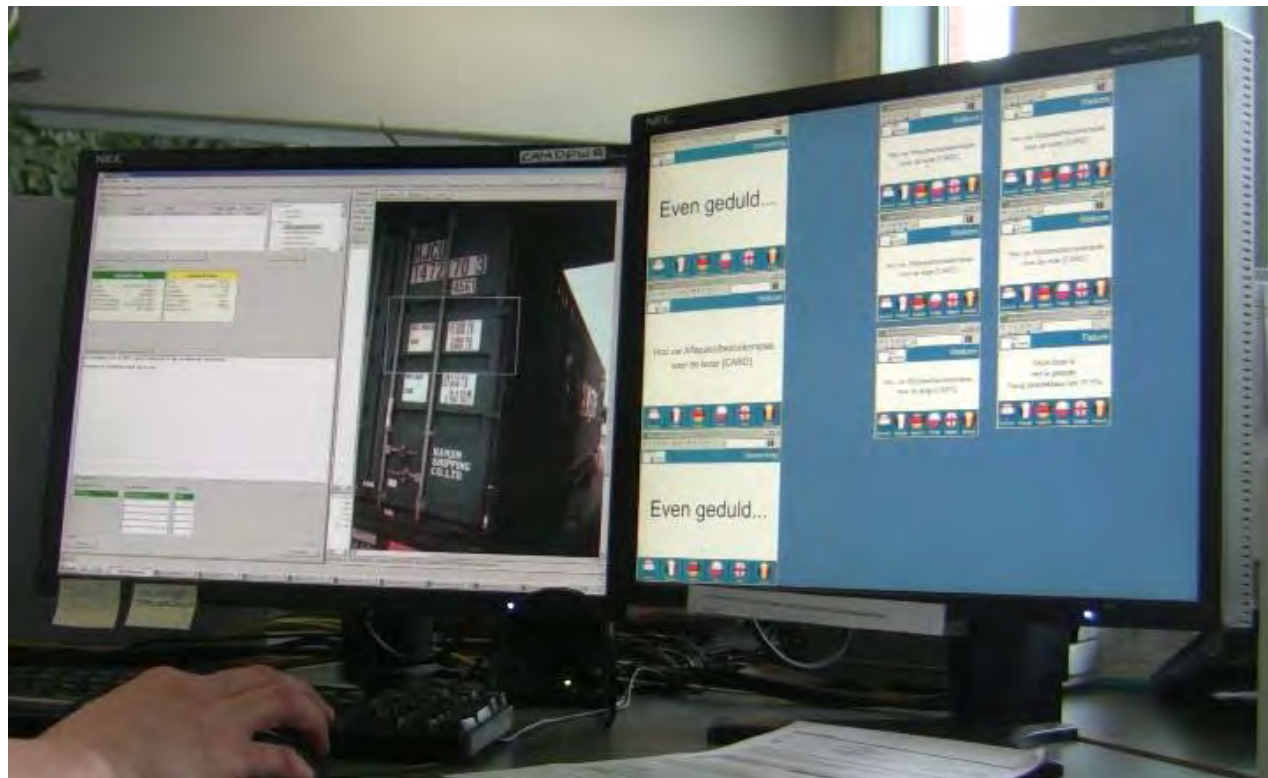

## GATE OPERATING SYSTEM GOS

- Gate control
- Data capture
- Interaction with driver
- Interaction with ISPS
- TOS integration
  - Data validation
  - Yard & equipment management
  - EDI interfacing

# Gate System - Components

## GATE OPERATING SYSTEM GOS

- Exception handling
  - OCR corrections
  - Booking mismatches
  - Help Desk for drivers

# Gate Management Systems - Automated

## OCR CAMERA PORTAL

- Condition recording
- Identification truck – container(s)

## KIOSK/PEDESTAL SYSTEMS

- Drivers process own registration

## GATE OPERATING SYSTEM GOS

- Interface with TOS

## FAST - PRECISE - EFFICIENT

- Limited gate staff
- Safe environment
- Remote exception handling

# OCR Accuracy rates → Exception jobs

	Truck OCR Portal
Container number	>98%
ISO Code	>98%
IMO Placards - presence	>92%
IMO Placards – Class (OPTION)	>90%
License Plate number - Tractor	95%+
Container position	99%
Container door direction	99%
Seal presence (OPTION)	>93%
Empty Chassis	100%

- OCR accuracy rates gives false perception
- What really counts is the number of exception jobs.
- #exception jobs depends of number of attributes (seal, IMDG, door, ISO,..)
- Reports of # exception jobs is automatically generated

# Manual vs Automated Gate Systems

---

## MANUAL GATE SYSTEM

- LIMITED INVESTMENT  
(NO EQUIPMENT REQUIRED)
- HIGH OPERATING COST
- TIME-INTENSIVE  
(ALL DATA NEEDS TO BE ENTERED MANUALLY)
- INACCURATE DATA
- UNSAFE WORK ENVIRONMENT
- LOT OF SPACE REQUIRED

## AUTOMATED GATE SYSTEM OCR PORTAL

- LIMITED INVESTMENT  
(LIMITED # OF PORTALS REQUIRED)
- LOW MAINTENANCE COST
- FAST & EFFICIENT  
(AUTOMATED REGISTRATION & HANDLING)
- HIGH ACCURACY RATE
- SAFE WORK ENVIRONMENT
- LIMITED SPACE REQUIRED

# Gate Management Systems: Rail

# Gate Management Systems: Crane

# Conclusion

- Reduction turnaround time of the trucks
- Smoother traffic flow at the Gate Lanes
- Higher Data accuracy
- Minimum processing time
- Efficient exception handling
- Extensive Integration

**Productivity**  
**Safety**  
**Profitability**  
**Security**

CAMCO TECHNOLOGIES
